TWCWG3

Web Data, tools and outputs S-1xx PS

Vina Del Mar, Chili

2018-04

- Suggestion 2017, 07-09

- Today, a new website will be dedicated for S-100 and its dependent product specifications.
- Contact : Tony Pharaoh
- There will be a page for each product specifications resources (Tony P. is looking at using a Git hub repository or setting up a SFTP folder for each WG).

- Suggestion 2017, 07-09

The pages are complied using simple markdown, so it should be quite easy for anyone to create/edit/update content (please see below). I will set up a template for Prod Specs (taking into account your attached document) so that we can maintain some level of consistency. Hopefully this will be a "one stop shop" where all S-100 and S-10x resources can be downloaded.

•Please see http://s100.iho.int/S100/ There is still some work to be done - but will keep you posted.
