2010	review
2011-2013	Hydrography for Charting, Disaster prevention and Environment protection course

Conclusion

- There is no Royal Road in applying the fund.

- The funding agencies have their agenda. We have to carefully read and find a good match with their agenda and our requirement.

- Substantial way of business is appreciated. Formality and appearance are not.

- Read the atmosphere. If the change in environment and situation may affect the course, take into account and revise the course.

- Result or outcome from the capacity building course is highly appreciated. If not, leads to sad result.
