### GENERAL SPECIFICATIONS

(Please provide detailed information in Annex of no more than three pages)

<b>Background information</b>	The HydroMOWCA definition study held in 2015-2016 has set a dedicated regional CB programme. This programme relies on multiple targeted initiatives and projects that would significantly leverage the development of hydrography in that region. As those projects require significant funding, they're supposed to be carried out towards international and regional funding organizations acting in that region.
<b>Justification of the project</b>	
<b>Countries involved</b>	All African coastal States inside the EAthC region.
<b>Explanation of the problem</b>	The United Nations and the African Union emphasizes the fact that the development of the Blue Economy in Africa is to be a major leverage. However, most investors and funders haven't implemented marine knowledge as a prerequisite to a sustainable and comprehensive development of the maritime economy. Worse, the development of marine knowledge and expertise is completely off the grid to some of major funding organizations strategy in the region.

	Therefore, the proposals made with HydroMOWCA's regional CB programme should be promoted to those funding bodies in a way that suits with current concerns: Blue Economy, Climate change and environmental management, development of information and communication technologies and access to education.
<b>General objective</b>	The main purpose of that submission is to promote the regional programme set by the HydroMOWCA study in order to concretize funding opportunities.
<b>Specific objectives</b>	This purpose requires to schedule several on-site visits to local funders and organizations: EU delegations, ABD, WADB, IDB, MOWCA, WB.
<b>Outputs/Products</b>	Every visit will be reported accordingly to the IHB, the CBSC and the EAHC Members.
<b>Other deliverables</b>	
<b>Achievements and awaited benefits</b>	Those visits will be made for the purpose of getting funds for the regional CB programme related to the EAHC.
<b>Schedule of activities</b>	
<b>Past and/or current related projects supported by CBSC or other sources</b>	HydroMOWCA definition study held in 2015-2016 in that region.
