Background information	<p>The collection and circulation of Maritime Safety Information (MSI) is critical for navigation safety, however, the provision of MSI has been identified as lacking in the region.</p> <p>As reported by the WWNWS-SC to IRCC9, a critical issue for the continued success of the MSI courses was the lack of qualified trainers. The WWNWS-SC Chair suggested that a course could be developed to train new trainers, who had a suitable background and the necessary operational experience. It was recognised this would need to be funded and fitted into the IHO CB strategy plan, it was recommended this issue was raised to the next CBSC.</p>
-------------------------------	---

Justification of the project	The IHO is actively encouraging Regional Hydrographic Commissions to identify National MSI Coordinators who can be appointed as additional MSI trainers. It is envisaged that MSI trainers would become part of the delivery team. This initiative is an action identified at IHO's Inter-Regional Coordination Committee at IRCC9 (Actions 2, 3, 4 & 5) and Capacity Building Sub-Committee at CBSC15 (action 15), June 2017. In May 2018, the SWPHC Chair invited Maritime Safety Authority of Fiji (MSAF), as National MSI Coordinator, to become part of the delivery team. MSAF supports this initiative and Mr Sunil Kumar was part of the team delivering the MSI training in August 2018.
