What type of legacy data is included under each CATZOC classification in your ENC's?

Please complete the form below for each CATZOC value. Examples from the United Kingdom Hydrographic Office have been provided as a guide.

If you do not populate CATZOC for legacy data in your ENC's, please indicate this in the Additional Comments section at the bottom of the form.

CATZOC allocated by HO	Data acquisition method		Comments
A1			Our ENC's don't have this values.
A2			
B			
C			
D			

**Additional Comments:**

The CATZOC for both legacy and modern data will be populated in our ENC's next year. But it is very difficult to determine CATZOC values for the data which have surveyed long ago, because the depth might vary with time in some locations. It is thought that we should consider this variation in encoding CATZOC. But we have not yet found a good solution of the problem.
