

Annex A to IHB CL 59/2010
S3/8151/DQWG

CATZOC CLASSIFICATION OF LEGACY DATA - REPORTING FORM

(to be returned to the IHB by **20 October 2010**)

E-mail: info@ihb.nic - Fax: +377 93 10 81 40)

Member State: ITALY

Contact: CDR Alessandro Nobili

E-mail: alessandro.nobili@marina.difesa.it

What type of legacy data is included under each CATZOC classification in your ENC's?

Please complete the form below for each CATZOC value. Examples from the United Kingdom Hydrographic Office have been provided as a guide.

If you do not populate CATZOC for legacy data in your ENC's, please indicate this in the Additional Comments section at the bottom of the form.

CATZOC allocated by HO	Data acquisition method	Comments
A1	Not used for legacy data (survey date 2000 or prior)	
A2	Not used for legacy data (survey date 2000 or prior)	
B	Definition of CATZOC is based on empirical method referring to IT survey practice taking into account:	single beam systems are used for depth measurement in surveys prior to 2000
C	Chart scale and planned survey lines space; Geodetic reference accuracy;	
D	Positioning system; Depth measurement system; Tidal measurement system and model accuracy; Speed of sound model accuracy; Digitalization of fairsheets accuracy.	

Additional Comments:

The most of ENC's published by Italian HO derived from paper charts and CATZOC takes into account accuracy of digitalization.
