Operation of the ENC service

OFFICIAL ENC SERVICE

Coverage Primar Stavanger Chart Catalogue

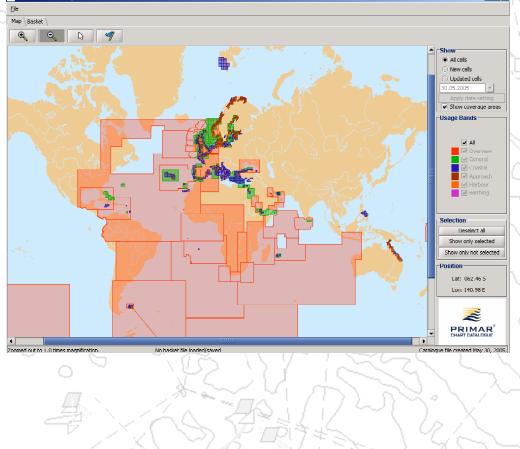

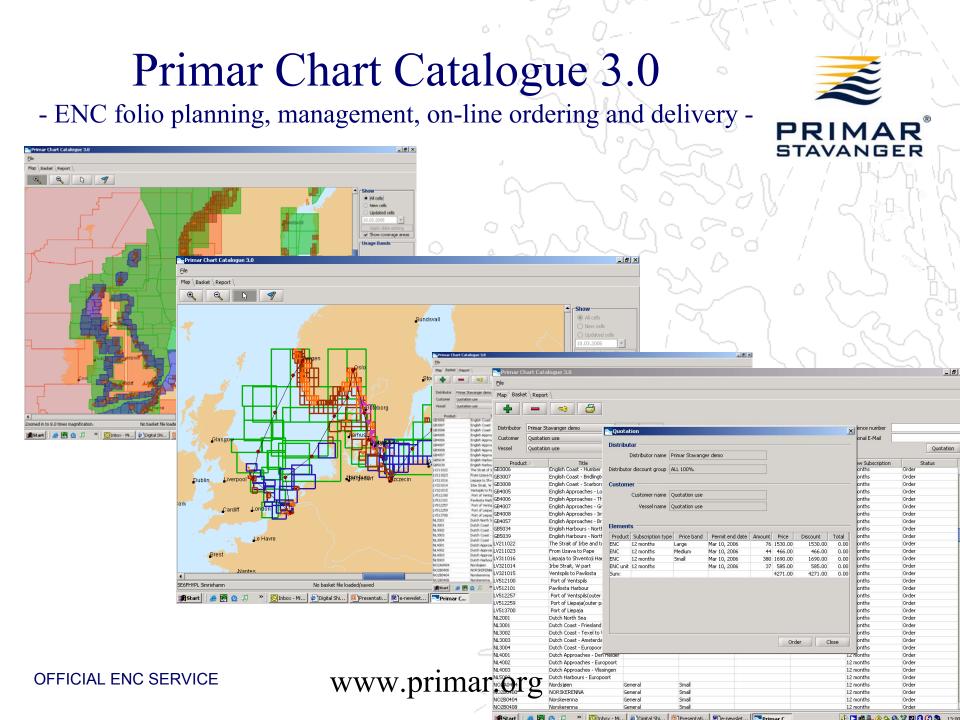

PRIMAR

STAVANGER

• New ENCs every week

- Coverage increasing in Asia and North- and South-America
- Focus on developing coverage for most important international shipping routes.

Developments

PRIMAR

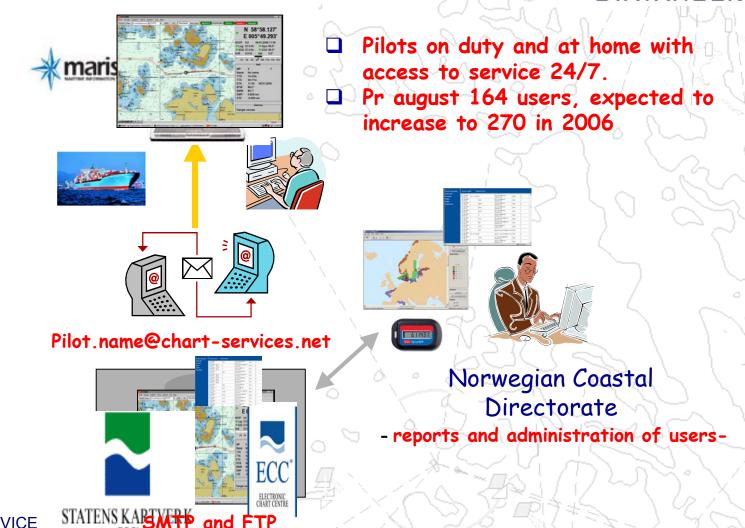

- Developed support for cell key exchanges to support cell key unicity between IHO S-63 qualified Data Servers. Includes XML sales reporting between Primar and its Qualified Distributors.
- Developed and set in operation an ENC signature service. Managed by ECC AS under an agreement with Norwegian Hydrographic Service and UKHO. Primary server in Monaco with backup in Stavanger. Require and delivered 100% availability and performance.
- Real-time ENC sales reports available to cooperating Hydrographic Offices
- Remote ENC updating. Service established to support remote ENC updating for the Norwegian State Pilots. Using a portable ECDIS as client and e-mail for data transfer.
- Prototype Primar remote updating service developed and in prototype testing. Service is using Chart Catalogue or ECDIS as client and enables easy management and instant transfer of ENC updates directly to users.

Norwegian Pilots ENC updating

-in operation from 1 march 2005

PRIMAR

OFFICIAL ENC SERVICE

Remote updating direct from Primar Stavanger ENC Service (estimated from 2006)

- ENC updating via any ship shore communication
- Direct via web, e-mail or Primar Chart Catalogue
- Updated ENCs is IMO Solas requirement for navigation on ECDIS
