Intergovernmental Oceanographic Commission

Manual on Sea Level Measurement and Interpretation

Volume V: Radar Gauges

Contents

Foreword

1. Introduction

- 1.1 The Need for Tide Gauges
- 1.2 Earlier Tide Gauges

2. Radar gauges

- 2.1 Types of Radar Gauge
- 2.2 Radar Gauges in GLOSS
- 2.3 Summary on Radar Gauges for GLOSS
- 2.4 Radar Gauges for Wave Measurements

3. Intercomparisons with Other Technologies

4. Radar Gauge Installation

- 4.1 The Choice of a Tide Gauge Site
- 4.2 Suitable Radar Gauge Locations
- 4.3 Radar Gauge Mounting
- 4.4 Radar Installation Software
- 4.5 Before Installation
- 4.6 Field Calibration and Verification Procedures
- 4.7 Potential Sources of Radar Measurement Error
- 4.8 Need for Other Sensors

5. Datum Control and Levelling

6. Additional Equipment needed for Radar and Other Tide Gauges

Data loggers, DCPs, real-time data transmission, GTS.

7. Sea Level Data

- 7.1 Sea Level Data Centres
- 7.2 QC of Data
- 7.3 Computing Hourly Values and MSL from the Higher Frequency Data from Radar Gauges

8. Training Materials and Contacts

9. List of GLOSS Groups with Radar Gauges (and available for advice).
