

IOC – GLOSS submitted by IHB

The IOC GLOSS Group of Experts meets every two years. The last meeting GLOSS GEX was held in May 2007 as reported at the IHOTC8 meeting in Canada.

The next meeting, GLOSS GEXI, is scheduled to take place at the IOC in Paris from 13 – 15 May 2009. This will be preceded by a Workshop on Precision Observations of Vertical Land Motion at Tide Gauges from 11 – 12 May. Further information is available from the meeting web site: <http://ioc-goos.org/glossgexi>

Steve Shipman will represent the IHB at this meeting and it is hoped that other members of the TWLWG will attend as representatives of their national Hydrographic Offices.
