

Publication of the English text of the French “Coastal Tides”

1. Following TWLWG3 the proof reading of the French manual on “Coastal Tides” was completed and the amended text sent to the Institut Océanographique (IO) on 17 June 2011. The final copy of the English Manual was received from IO on 21 November 2011. An explanation was provided for some of our draft amendments which had not been included, primarily due to accepted scientific journal formats/wording. The text was then given final approval on 2 December 2011.
2. IO are arranging for the printing, to be done by SHOM. The HB is due to receive 100 copies of the printed document. These will be distributed to each Member State and to each recognised Cat A / Cat B training establishment. At the time of writing, 27 February no availability date has been received.
3. TWLWG4 is invited to consider this information and take any action it considers appropriate.
