

Comments from Italy on Proposals

(by e-mail of 29 Oct 2010)

Looking to the different proposals made by France and Australia, I think it could be possible to find a technical solution of the most important and difficult item of the agenda of the WG.

Unfortunately, I understood that now the problem is considered exclusively under the political point of view, with political pressures and, under these conditions, it is not possible for me to give any kind of contribution.

I will be happy to contribute to the work when topics will be bring back to a technical point of view.
