

## Worldwide ENC Database Working Group (WEND-WG)

### **Graphics and Spreadsheets relating to Global and Regional ENC coverage**

The accompanying documents include graphics showing the global coverage of ENCs, the extent of overlaps between ENCs, and spreadsheets providing details of individual ENCs in each user band.

This information is provided by the UKHO in good faith, and reproduced with their consent for illustrative purposes.

The detailed information replicates data held on the UKHO AVCS database, and elsewhere within UKHO records, and is correct to week ending 24<sup>th</sup> August 2012. A small number of ENCs are not currently available through the UKHO AVCS, mainly in the EAHC and MBSHC regions.

#### Notes:

1. Coverage of the ARHC region is included within the EAHC, NHS, NSHC, and USCHC material.
2. The graphics show both coverage and overlaps in user bands 1, 2 and 3. It was not practical to provide graphics for the larger scale user bands, however the accompanying spreadsheets give lists of the appropriate ENCs for all six user bands, and also a full list of ENCs which overlap.
3. Overlaps of less than 5 metres are ignored.
