Examples of MSDI applications

Exemples d'applications MSDI

Hydrographic data at SHOM

■ Bathymetry

- ~ 5.2 billion soundings (2300 surveys, 9400 data sets)

■ “General” hydrographic data

- ~ 31000 navigational aids
- ~ 10000 wrecks/obstructions/underwater rocks
- ~ 1500 submarine cables
- ~ 4500 maritime limits and boundaries

■ Tide

- All data : tide observatory sheets, height series

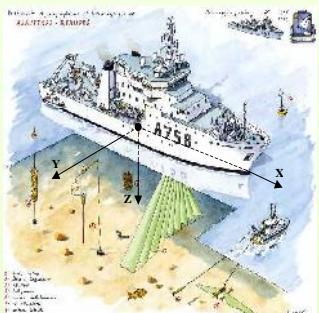

■ Currents

- All data : observations, models

Data.shom.fr ... figures

✓ Infrastructure

- Data volume = 2 To
- VM nb = 20 (14 prod / 6 qualif)
- Specific link between SHOM and distribution data center

✓ Trafic

- ~220 visits per day
- Consulted data volume = 4,5 Go/day

✓ Most popular data

- RasterMARINE
- ScanLittoral
- Tidal currents
- RasterENC, vertical references, wrecks, Bathymetry

Services de valorisation de l'information

Data exploitation services

INFONAUT : feedback service

infonaut.data.shom.fr

- General use web site
- For SHOM users
- Data improvement

The screenshot shows the INFONAUT web application interface. At the top, there is a header with the SHOM logo and the text "INFONAUT Service de remontées collaboratives d'informations nautiques du SHOM". Below the header, there are three main sections: "CATÉGORISER", "2. POSITIONNER", and "3. DÉCRIRE".

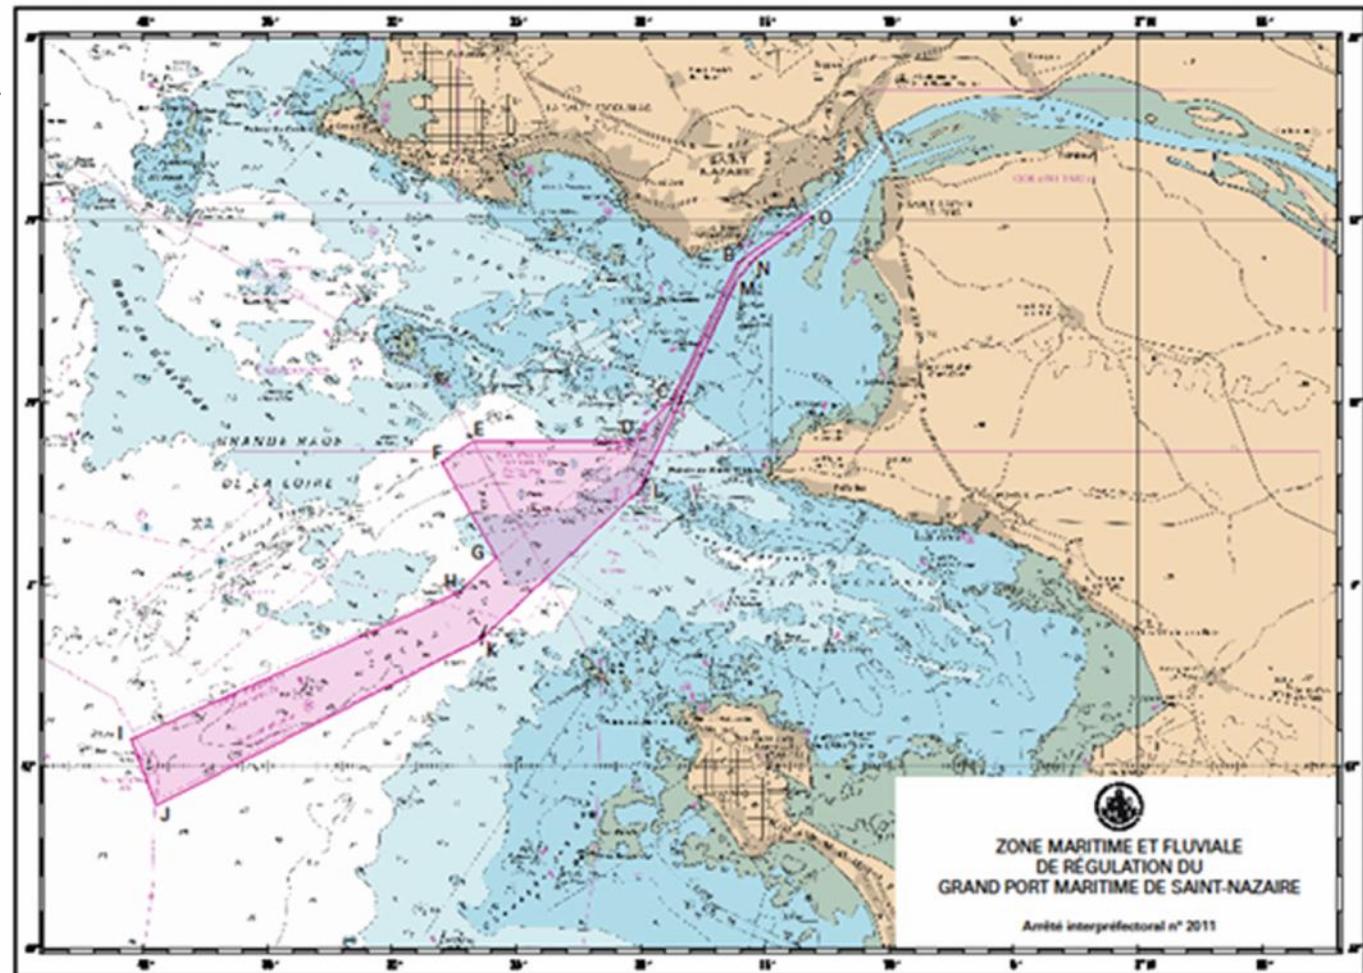

- CATÉGORISER:** A sidebar on the left containing a list of categories for reporting nautical information. The categories include: Profondeurs, Epaves et obstructions, Trait de côte, Câbles et conduites, Toponymes, Bouées, balises, Zones réglementées, Autres (préciser), Natures de fond, and Feux et signaux de brume. A button "Saisir une information" is located at the bottom of this section.
- 2. POSITIONNER:** The central part of the interface features a map of the Baie de Morlaix. A yellow marker indicates the position where a new information point is being placed. The map includes depth contours, coastlines, and various nautical features.
- 3. DÉCRIRE:** The right side of the interface contains a detailed description of the information being reported. It includes fields for Date de création (01/05/2013 16:44), Statut (En cours de traitement), Contributeur (DIRM NAMO/DIESM/SPB), and Description (Balise de caractère latéral Tribord, nommée "Rheun Predou". Cette balise n'existe plus, constaté le 17 septembre 2012.). There is also a legend indicating that red means "refusé" and green means "validée".

At the bottom of the page, there is a footer with the text "13^{ème} CHAtO – Exemples d'application" and "Echelle: 1 : 170 000".

Dynamic mapping

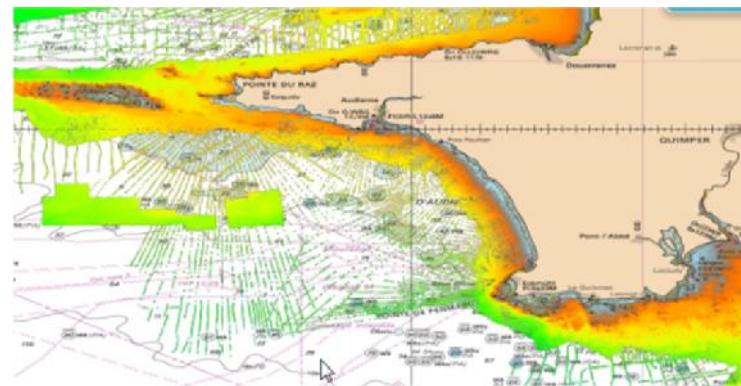

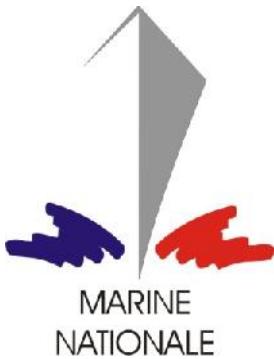

cartodyn.data.shom.fr

- Choose appropriate data layers
- Use the drawing tools
- Choose your legend
- Save your work
- Print your map

Cartographic Chat

- Several people working on the same map
- Chat interface
- For producing charts directly with the client

Les services métiers (*business services*)

Tide prediction

- A webservice dedicated to tide predictions online
- Instantaneous generation of XML files

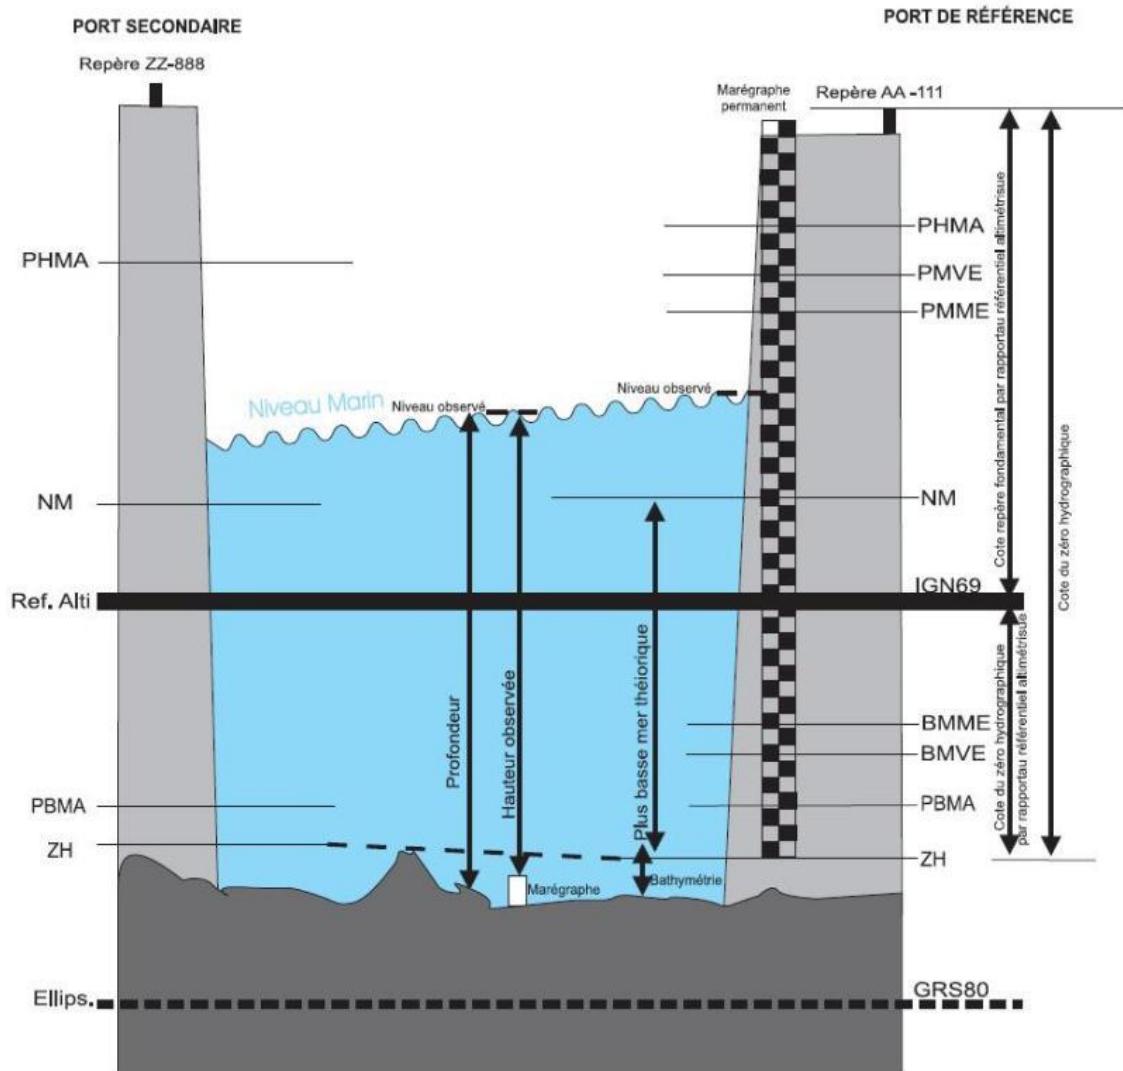

The screenshot shows a web-based application for tide prediction. At the top, there is a login form with fields for 'clé' (key), 'login' (username), and 'mot de passe' (password). Below the login is a link to 'Flux orthophoto littorale V2 de Geolitoral' with its URL: <http://geolitoral.application.developpement-durable.gouv.fr/wms2/metrcode>.

The main interface features a map of the French coastline from Bretagne to Normandie. Various locations are marked with red dots and labeled, such as 'Les Héaux-de-Bretagne', 'Port-Blanc', 'Treboulon', 'Locquirec', 'Saint-Davy-Pontivy', 'Bénodet', 'Porslous', 'Briec', 'Tréguier', 'Lannion', 'Poullaouen', 'Roscoff', 'Prat', 'Ménez Pen Ar Lann', 'Aber Wrac'h', 'Penzé', 'Brest', 'Concarneau', 'Merdrignac', 'Nostang', 'Douarnenez', 'Audierne', 'Vannes', and 'Rosporden'. On the left, a sidebar titled 'DONNÉES' contains links for 'Ajouter des données externes', 'Exporter/Importer un contenu', 'Extraire des données', and 'Prédiction des Marées'. A central panel displays a 'Service de Prédiction des Marées' dialog box. This dialog includes a dropdown menu for selecting a location ('Aker-Bonni_1999_GENOU_VENAL_RENAUD_France'), a 'Prédiction' section with options for 'Annuler la marée' and 'Hauteur des vagues par heure', and a 'Seuil d'alerte' section. Below these are buttons for 'Annuler' and 'Calculer'. At the bottom of the interface, there is a status bar showing coordinates: 'NG84: 48° 39' 48.4" N, 4° 16' 05.8" W' and an 'Echelle: 1: 728 959'.
