Report of the MACHC INTEGRATED CHART COMMITTEE

INT CHART AND ENC COVERAGE FOR THE MACHC REGION

DECEMBER 2013

INTRODUCTION

The purpose of the Meso American and Caribbean Sea Hydrographic Commission's (MACHC) Integrated Chart Committee (MICC¹) is to provide consistency in the development and maintenance of regional charting schemes, and the monitoring of INT charts and ENC production, in order to improve standardization in International Hydrographic Organization (IHO) charting activities. This work has been on-going independently in the past by the INT Chart Committee and the Electronic Chart Committee. The MICC was officially inaugurated at the 13th MACHC in 2012 in Guatemala and joins together the activities of the former INT Chart Committee and the former Electronic Chart Committee of the MACHC.

This Report outlines the activities of the two former committees in one comprehensive report. The Report consists of the introduction plus 3 parts as follows:

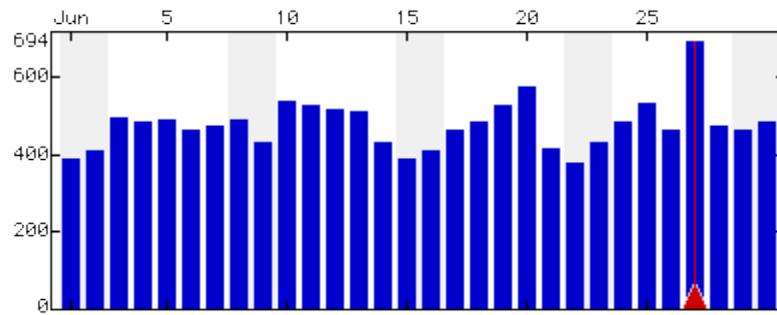

1. Section 1-INT Charts
2. Section 2-ENCs
3. Section 3- Recommendations

BACKGROUND

Previous to the 13th MACHC, the INT Chart Committee and the Electronic Chart Committee operated independently as separate bodies within the Commission. For ENC planning, especially at the smaller scales were often based on the paper INT charts, a great deal of interaction and communication was necessary. Additionally, since a significant number of representatives were common to both committees, they often met together to properly coordinate activities. As a result, the initial determination for the development of ENC scheme was based on the INT Chart scheme "footprint" within the MACHC. In order to proceed with both INT and Electronic Chart activities, it is considered beneficial to produce both the INT chart and the ENC either concurrently or at least within as close a time frame as possible. As a number of States use automated methods to produce the paper INT chart, producing the corresponding ENC is a relatively simple task in these instances, especially when compiling small-scale charts.

¹ The MICC was formally established in December 2012 at the 13th MACHC in Guatemala. Prior to this time, all ENC activities were conducted by the Electronic Chart Committee/Working Group 2 (ECC/WG2).

The joining of the two former committees also provided the opportunity to resolve the apparent confusion which has lingered for some time about the differences between the two MACHC websites; the one maintained by the IHO, and the other by U.S. NOAA. In order to clarify the distinctions between the IHO MACHC and NOAA MACHC websites and to eliminate redundancies, the U.S. (NOAA) issued a proposal (Action 13.2.28) to make appropriate adjustments to its website to reflect a focus solely on the work of the MACHC Committees; the MACHC Integrated Charting Committee--MICC; the Marine Economic Infrastructure Program—MEIP; and Capacity Building Committee. The NOAA maintained site will now serve as a document repository for the working Committees of the MACHC. Further, the NOAA site will no longer duplicate MACHC documents which are available on the IHO website, such as Commission meeting and related documents, Circular Letters and Statutes. The NOAA MACHC site will provide links as appropriate to the IHO MACHC site and vice versa. This proposal was accepted at the May 22, 2013 MICC Conference Call and the appropriate adjustments are now in place. The revised MACHC Committees website is at: <http://www.ihc-machc.org/> and is receiving approximately 500 hits per day as shown in the graphic.

This is a representative graphic of the website's activity for June 2013.

SECTION 1-INT Charts

INTRODUCTION – INT CHARTS

The INT Chart concept is based on the potential enormous economies which can be realized if several Hydrographic Offices publishing charts of a particular region or port were to come to an understanding as to the reproduction of these charts on a common basis. The aim of this concept is to facilitate the provision of minimum sets of charts suitable for the navigational requirements of international (foreign-going) shipping. Such internationally-conceived charts will also enable those IHO Member States who provide, or wish to provide, charts outside their own national waters, to print by facsimile reproduction with only superficial modifications, selected modern charts under the terms of a bilateral arrangement between the affected Member States.

BACKGROUND

The idea of a common, worldwide chart series (INT Charts) produced to a single set of agreed specifications and standards was adopted by the IHO in 1971. Under this arrangement, Member States wishing to print their own versions of another Members' INT Charts may do so by obtaining (via mutual agreement) copies of the necessary reproducible material and printing their own copies and making them available through their normal distribution channels.

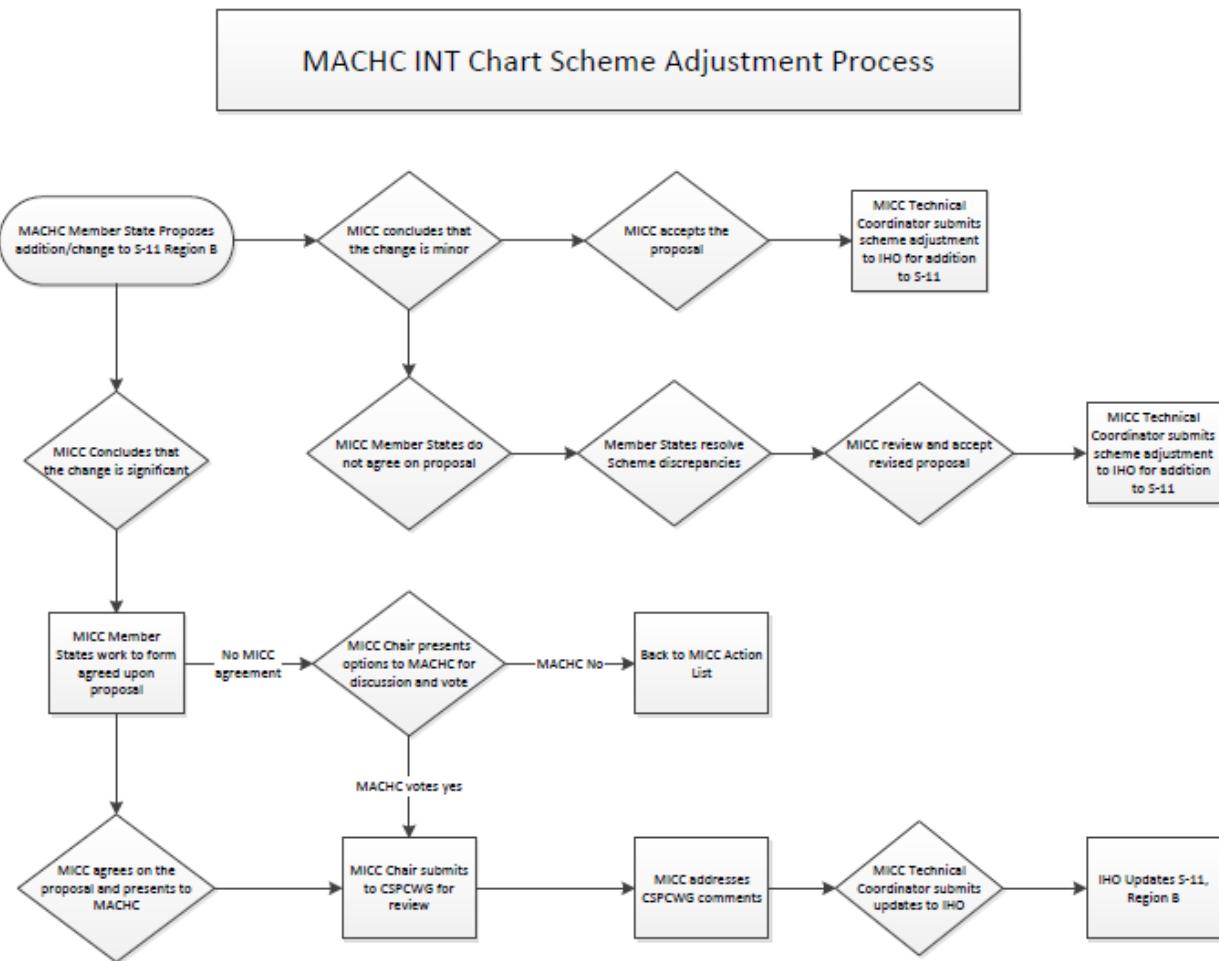

The IHO programme for small scale (1/10 000 000 and 1/3 500 000) INT charts, has been completed and many of the charts at medium and larger scales are in the developmental stages. The Meso American-Caribbean Sea Hydrographic Commission is responsible for the area identified with the green shading on the map at the left. One major task at hand is to complete the identification of those countries who have agreed to produce or distribute charts.

The INT Chart Committee has always worked very closely with the Electronic Chart Committee, and now that the two entities have united, the tasks at hand will be handled more efficiently. Identification of "Producer" States, the first goal, is almost complete.

The MACHC INT Committee considers small and medium-scale INT charts a priority, in parallel with the Electronic Chart Committee approaches their goal of producing ENCs of this scale range in a similar fashion. Since these tasks are so closely linked, it is imperative that all potential INT Chart "Producer" States be identified in order to develop a coordinated compilation/production schedule.

WORK PROCESSES/METHODOLOGIES

The INT Chart concept requires Member States, Hydrographic Offices to work together with one another, with the primary objective to avoid duplicative work for chart coverage of targeted areas of common interest. The rules and regulations are extensively detailed in IHO Publication S-4, "Regulations of the IHO International (INT) Charts and Charts Specifications of the IHO". The MICC closely follows the methodology specified in S-4, but has developed a more detailed methodology for handling proposed additions and/or changes within the MACHC. See diagram below.

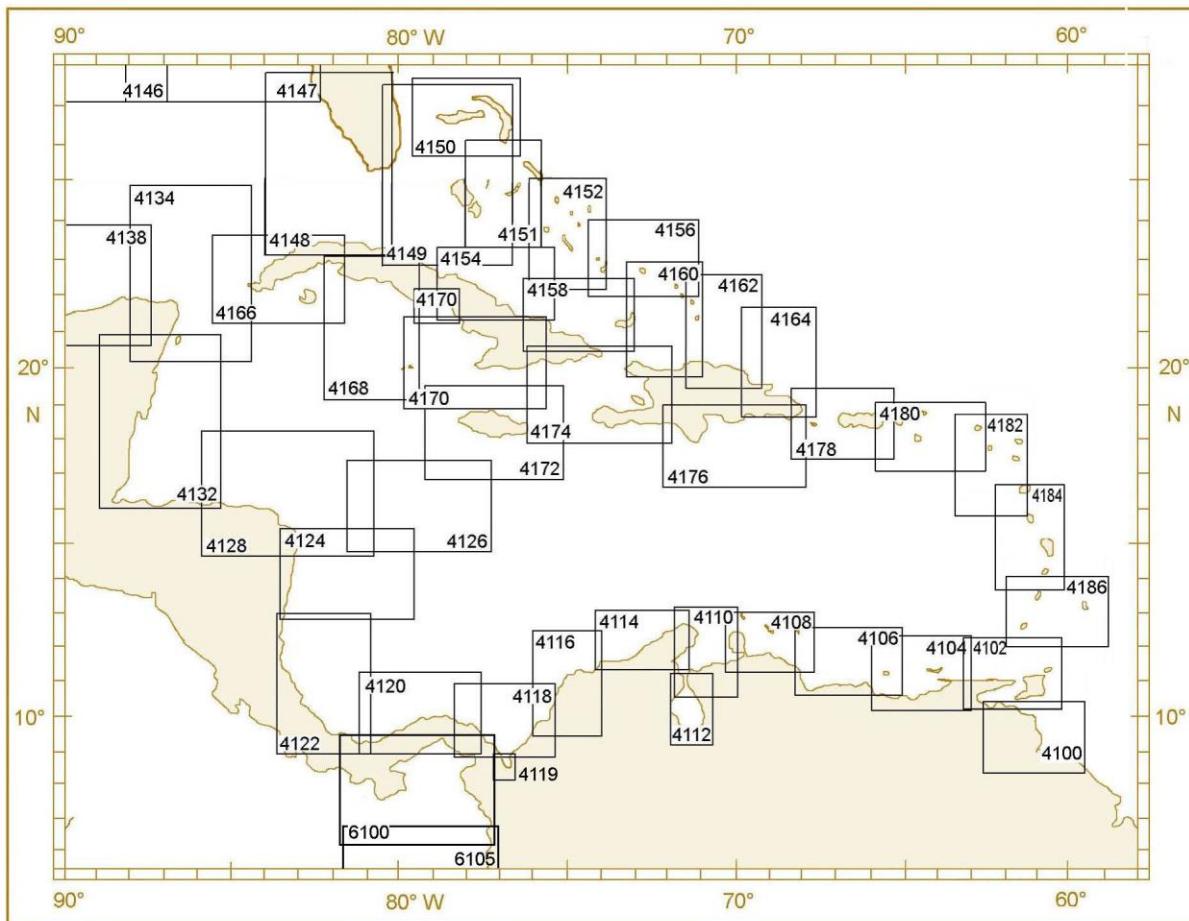

CONCLUSION

The MICC, as the combined INT Chart and Electronic Chart Committees, will continue to utilize the efficiencies gained by the joining of the two former committees. The MICC's first goal, the identification of "Producer" States, is almost complete.

The Committee considers small and medium-scale INT charts a priority as well, and will work to achieve a coordinated schedule for a parallel compilation/production of both INT Charts and ENCs. While the ENC production schedule is available in Annex A of this report, much of the INT Chart production is available in Edition 2.0.4 of Region B of S-11, dated November 2013, posted to the IHO website at: http://www.ihodata.int/ihodata_pubs/standard/S-11/S-11_PartB_Edition2.0.4.pdf.

A sample diagram is shown in the figure below.

SECTION 2-ENCs

INTRODUCTION – ENC

The second and complimentary purpose of the Meso American and Caribbean Sea Hydrographic Commission's (MACHC) Integrated Chart Committee (MICC)¹ is to facilitate the production and promote the availability of official electronic chart data for safe, efficient, and environmentally sensitive maritime navigation within the MACHC Region.

In order to ensure that adequate regional ENC coverage will be available to meet International Maritime Organization (IMO) Electronic Chart Display and Information System (ECDIS) carriage requirements in a timely manner, the MICC was tasked at the 10th MACHC Conference (November 2009, Barbados) to assess ENC coverage. The MICC was additionally tasked to develop an ENC scheme to ensure adequate ENC coverage by the first deadline (July 2012) set by the International Maritime Organization (IMO). The MACHC endorsed the group's initial goal:

"Achieve adequate regional ENC coverage by December 31, 2010 (using the medium scale INT Chart Scheme as the baseline for adequate medium scale ENC coverage--usage bands 2/3)."

ENCs are required to enable safe port-to-port navigation for international shipping, and they must correspond to the paper chart coverage for the routes between the ports, as well as the port areas themselves.² For assessment purposes, adequate ENC coverage is attained when these ENCs are produced and available.

The former MICC submitted their report, *ENC Coverage of the MACHC Region* to the 11th MACHC Conference in Suriname, in November 2010. The Report was endorsed by the full MACHC and copies were made available to IHO and other interested parties. Further, at this meeting, the original goal was expanded to include adequate ENC coverage for Usage Bands 4-6 for the Atlantic side of the MACHC and for all Usage Bands (Bands 1-6) for the Pacific side of MACHC Member States.

A similar Report was prepared for the 12th MACHC in St. Kitts. This Report was a continuation of the first Report and essentially served as a progress report.

This report provides further progress and expanded information on the status of ENCs. The Report's annexes: 1) summarize the status of ENC coverage for the entire MACHC region; 2) depict a regional ENC scheme (Annex A) agreed to by the MACHC Member States in a format similar to that of the paper INT Chart Scheme found in Ed. 2.003 of S-11; and 3) contain recommendations for near-term actions to resolve specific identified issues.

² This definition was adopted in October 2007 at an extraordinary meeting of the IHO WEND Committee to specifically consider matters arising from IMO/NAV53. It was subsequently communicated at NAV54 in April 2008.

BACKGROUND

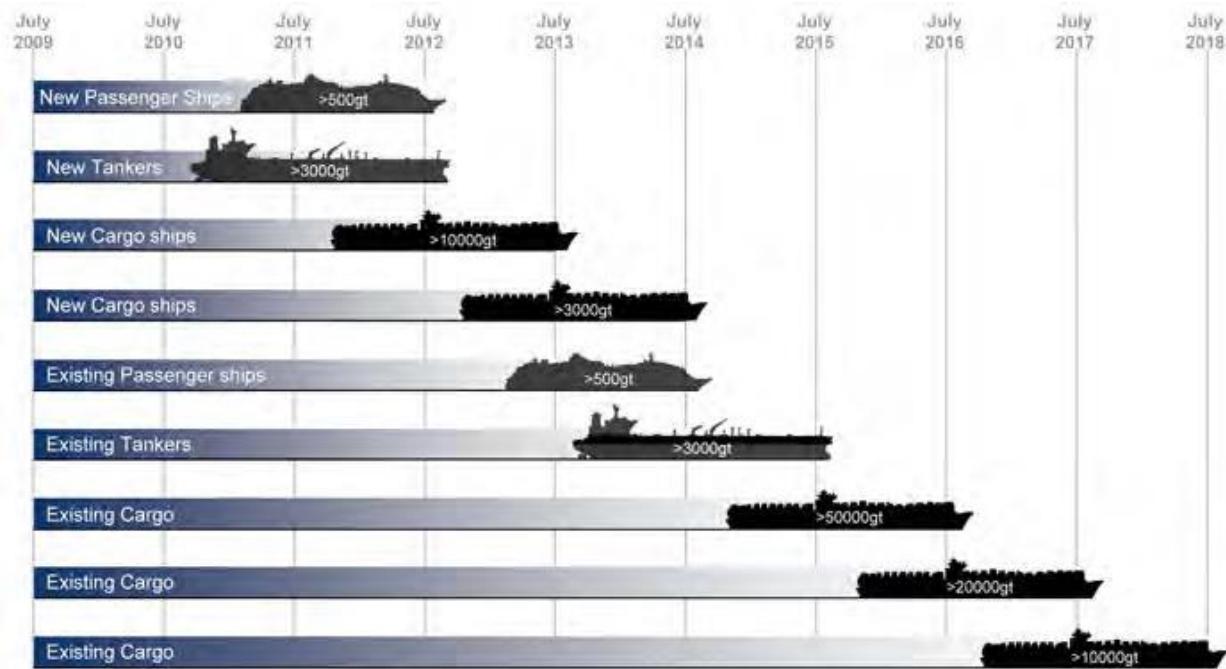

Several drivers have heightened the need for the successful completion of the MICC work program.

INTERNATIONAL MARITIME ORGANIZATION CARRIAGE REQUIREMENTS

In December 2006, the 82nd session of IMO's Marine Safety Committee agreed to amendments to the High Speed Craft (HSC) Code with regard to ECDIS, which requires that High-Speed craft shall be fitted with an ECDIS:

New vessels	Existing vessels
craft constructed on or after 1 July 2008	craft constructed before 1 July 2008, not later than 1 July 2010

Further, in 2009 the International Maritime Organization announced the six-year timeframe for implementing ECDIS as a carriage requirement for large passenger, tanker, and cargo ships:

Courtesy of UKHO

As the 2014 deadline for implementing ECDIS as a carriage requirement for Existing Passenger Ships approaches, the Cruise Industry has become more engaged in the deliberations of the MICC. Since Passenger Vessels will be required to have ECDIS on board, the importance of making ENCs available for the specific Cruise Lines destinations will be essential. Several Cruise Lines have indicated their desire

for ENCs for their specific ports of call within the MACHC area and the MICC is making every effort to have the ENCs in place by the IMO July 2014 deadline.

IHO CONFERENCE DECISIONS

At its 17th International Hydrographic Conference in May 2007, the IHO adopted two resolutions:

IHO Member States should adhere and comply with the IHO's Worldwide Electronic Navigational Database (WEND) principles, which provide technical details and procedures, in order to achieve adequate coverage, availability, consistency and quality of ENCs by 2010.

The IHO strongly supports the efforts by IMO to introduce mandatory carriage requirements for ECDIS, emphasizing that a significant coverage of ENCs is already in place and will be further improved by 2010, as indicated in the Det Norske Veritas report (NAV 53/INF.3) and supported by IHO assessments.

IHO WEND PRINCIPLES

The purpose of WEND is to ensure that high quality, updated, official ENCs are provided through integrated services that support chart carriage requirements of SOLAS Chapter V². According to the IMO performance standards for ECDIS:

- Member States will strive to ensure that mariners, anywhere in the world, can obtain fully updated ENCs for all shipping routes and ports across the world.
- Member States will strive to ensure that their ENC data are available to users through integrated services, each accessible to any ECDIS user (i.e., providing data in S-57 form), in addition to any national distribution or system-specific SENC delivery.
- Member States are encouraged to distribute their ENCs through an RENC in order to share a common experience and reduce expenditure, and to ensure the greatest possible standardization, consistency, reliability, and availability of ENCs.
- ENC duplication should be avoided; only a single country should produce an ENC for any given area. Normally, a Member State produces ENCs within their national waters; however, they can delegate responsibility for the production of ENCs, completely or in part, to another country. The designated country then becomes the producing country in the considered area.

In response to these drivers, the MICC recognized the need to improve regional ENC coverage in the short- to medium-term, and encouraged national hydrographic offices to produce and distribute ENCs that will improve maritime operations and environmental safety. In 2010, the MICC focused efforts on medium-scale (Usage Bands 2 and 3) ENCs, based on the equivalent medium scale (1:300,000, 1:400,000, 1:500,000- scale) INT Chart Schemes in the Atlantic side of the region.³ In 2011, the MICC continued efforts in the development of include large-scale ENCs (Usage Bands 4-6) on the Atlantic side

² SOLAS Chapter V, Regulation 9, requires Contracting Governments to ensure that hydrographic data are available in a suitable manner in order to satisfy the needs of safe navigation. Once the carriage of ECDIS becomes mandatory, there will be a consequential requirement to ensure that such data, as agreed by IMO, are available in a form suitable for use in ECDIS.

³ Information on Usage Band 1 is included in Annex A for reference purposes.

of the MACHC and all ENCs (Usage Bands 1-6) on the Pacific side. This effort has continued throughout 2012 and 2013.

WORK PLANS AND PROCESS

The work plan for 2010 assessed the adequacy of MACHC Region ENC (UB1-3) coverage, based on the INT Chart “footprint” which was used for the initial December 2010 assessment. The report was presented to the 2010 MACHC meeting in Suriname. For 2011, the group expanded on the previous work plan to:

- utilize the concept of “priority ports” to guide Usage Bands 4-6 ENC construction/coverage of the MACHC Region-Atlantic side;
- assess coverage of priority ports to guide ENC construction/coverage of the MACHC Region-Pacific side;
- coordinate action plans for addressing gaps and overlaps in ENC coverage between countries; and
- continue the communication strategy used in the 2010 assessment to track progress and resolve issues.

Although a great deal of work has been completed, especially on the Atlantic side, the above efforts continue until transition to a “maintenance” stage is achieved. The work plans for the past years are found in Annex C. This past year, the MICC held three conference calls (March 13, May 22, and October 23) and one face-to-face meeting are planned for December 9, 2013 just prior to the MACHC Conference.

Between calls and meetings, participants communicated primarily via e-mail and the new revised MACHC Committees website.

DATA ANALYSIS METHODOLOGIES

2010 for the Atlantic Side: Usage Bands 1-3

To successfully and accurately report on regional ENC coverage, and to appropriately plan to address regional ENC deficiencies, the UKHO and the MICC technical coordinator produced a baseline assessment of regional ENC coverage by breaking this assessment into two components: officially distributed data; and data not yet distributed. During the first year (2010), the UKHO first assessed regional Usage Bands 1, 2, and 3 ENC coverage for ENCs currently distributed through the Regional Electronic Navigational Chart Coordinating Center (RENC) and compared it to the data footprint of the small to medium scale INT Charts for the MACHC Region. Then the UKHO analyzed Usage Bands 1, 2, and 3 ENC coverage for ENCs produced, but *not* currently distributed through the RENC, and compared that to the data footprint of the small to medium scale INT Charts for the MACHC Region.

In the baseline assessment, the UKHO adhered to a pre-defined set of guidelines (Annex D) for ENC analysis. The guidelines required the identification and documentation of ENC deficiencies, such as:

- gaps in planned ENC coverage;
- overlapping ENCs within the same Usage Band between MACHC Member States;
- overlapping same Usage Band ENCs within national suites; and

- other data anomalies that could affect the use of ENCs in ECDIS.

The UKHO documented this information and, in conjunction with the MICC technical coordinator, delivered this report to representatives of MICC Member States.

*2011 Analysis Methodology for the Atlantic Side: Usage Bands 4-6 and
Pacific Side: Usage Bands 1-6*

The methodology for assessing adequate coverage for Usage Bands 4-6 was different due to the absence of an INT Chart Scheme for these scale bands. Thus in 2011, the MICC used existing national paper chart coverage of these areas as a guide for determining adequate ENC coverage. The MICC also used a list of “priority ports” as the baseline for assessing adequate coverage of major harbors and approaches to appropriately plan to address any coverage deficiencies. The UKHO initially derived this regional list of priority ports from the *Lloyd's Ports Listing*. UKHO entered the data into a GIS tool that produced a preliminary assessment of the number of ports with adequate coverage at Usage Bands 4-6. UKHO passed this information to the MICC technical coordinator, who produced national listings that were then circulated to all Member States for review and further refinement. The updated master list (Annex E) was an important tool for assessing whether these priority regional ports have adequate ENC coverage. This approach was also used on the Pacific side because no INT Chart Scheme is currently available for this part of the MACHC region.

CONCLUSIONS

ATLANTIC SIDE

For the Atlantic side, the MICC continued to make significant progress towards its goal of ensuring adequate regional ENC coverage (Usage Bands 1-6) by the various IMO dates announced in the six-year timeframe for implementing ECDIS as a carriage requirement (see page 6 above). The MICC established a regional scheme (see Annex A) that shows ENC coverage along with a tabulation of ENC cells and status, based on the format of the paper INT Chart scheme found in Ed. 2.003 of S-11. The tables in Annex A identify ENCs that are currently distributed, as well as the anticipated distribution dates of those not yet available for use by the mariner.

The tables below show the total number of ENC cells, as required, by Usage Bands to achieve adequate coverage as per the WEND Principles. Although this number will achieve adequate coverage within the Region, it should be noted that several Member States either already have or are planning additional cells to supplement their existing suite of ENCs to improve coverage beyond the “adequate” requirement of the WEND Principles. These additional cells are included in the listing of ENCs at Annex A to this report.

ADEQUATE ENC COVERAGE OF THE ATLANTIC SIDE OF THE REGION BY USAGE BANDS

Usage Band	Total cells	Cells currently available	Cells available by Dec 2013	Cells available by July 2014
Usage Band 1	7	6	6	7
		86%	86%	100%
Usage Band 2	22	17	17	19
		77%	77%	86%
Usage Band 3	106	77	79	90
		73%	75%	85%
Usage Band 4	188	148	154	170
		79%	82%	90%
Usage Band 5	286	232	242	269
		81%	85%	94%
Usage Band 6	13	12	12	13
		92%	92%	100%
All Usage Bands	622	492	510	568
		79%	82%	91%

PACIFIC SIDE

For the Pacific side of the MACHC Region, the MICC developed a similar regional scheme (see Annex A) that shows ENC coverage of the Pacific side along with a tabulation of ENC cells and status, based on the coverage of existing paper charts and the identified priority ports. The tables in Annex A identify ENCs that are currently distributed, as well as the anticipated distribution dates of those not yet available for use by the mariner.

ADEQUATE ENC COVERAGE OF THE PACIFIC SIDE FOR THE REGION BY USAGE BANDS

Usage Band	Total cells	Cells currently available	Cells available by Dec 2013	Cells available by July 2014
Usage Band 1	7	5	5	7
		71%	71%	100%
Usage Band 2	14	14	14	14
		100%	100%	100%
Usage Band 3	11	10	11	11
		91%	100%	100%
Usage Band 4	25	25	25	25
		100%	100%	100%
Usage Band 5	38	34	38	38
		89%	100%	100%
Usage Band 6	4	3	3	4
		75%	75%	100%
All Usage Bands	99	91	96	99
		92%	97%	100%

When all of the ENCs identified in the scheme are officially distributed, the region will technically meet the definition of “adequate” coverage, i.e., where there is a paper chart, (as identified in the INT Chart footprint) there is a corresponding ENC and all “priority ports” are covered by an ENC. The MICC also examined ENC schemes in adjacent Regional Hydrographic Commissions (Southeast Pacific Hydrographic Commission, Southwest Atlantic Hydrographic Commission, and U.S.-Canada Hydrographic Commission) and ensured that all MACHC ENC cells fit seamlessly with the adjacent schemes.

The MICC further acknowledges that some Member States may encounter circumstances, despite their best intentions, which may preclude them from completing their planned ENC coverage by the due dates as indicated in the Background Section on page 6. These circumstances may include technical issues, geo-politics, resource constraints, or capacity-building setbacks. Should this situation occur, the MICC developed options to provide potential ENC coverage as a temporary solution at the December 2011 St. Kitts meeting. They are further elaborated in recommendation seven.

SECTION 3-Recommendations

RECOMMENDATIONS

The MICC makes the following recommendations for 2014:

1. MICC continue to monitor and update the Region B, both for the Atlantic and Pacific side, ENC scheme for all Usage Bands, per the timetables indicated in Annex A.
2. As a permanent task, MICC invites all MACHC Member States to provide the MICC with updates to their ENC production plans taking into account:
 - a. IMO requirements for mandatory carriage and priority regional ports;
 - b. the availability of adequate survey data for ENC production (keeping in mind that, in some areas, hydrographic offices may not produce ENCs if data are out-of-date or not compliant with S-44 standards); and
 - c. the need to address national overlaps and consistency for all Usage Bands.
3. In order to create the IHO worldwide ENC database, the MICC encourages all ENC producers to make their ENCs available through Regional Electronic Navigational Chart Coordinating Centers, even if they are also distributed by different channels.
4. If Member States are unable to complete their ENC coverage in the designated timeframes, the MACHC, in partnership with appropriate authorities, should pursue options to address this situation, in accordance with the IMO ECDIS Requirements and the WEND principles, including:
 - a. **Utilize the WEND Principles and Implementation Guidance:** Partnering with another Hydrographic Office to provide coverage on a temporary basis to provide ENCs of specific areas until the affected Coastal State can provide their own.
 - b. **Capacity Building Assistance.** Request that the MACHC Capacity Building Committee provide support via technical training or other targeted assistance for a Coastal State to reach its ENC coverage goals.
 - c. **Re-evaluate Priority Ports:** Although the first IMO deadline for ECDIS requirements has passed, it affected only a limited number of vessels. However, the July 2014 deadline imposes the ECDIS Carriage Requirement on new cargo vessels greater than 3,000gt and on all passenger vessels greater than 500gt. This, in effect, calls for ENCs to be available for the ports of call for vessels in this category. An analysis of such ports and the vessels calling on them in conjunction with the staggered IMO carriage requirement deadlines will help determine appropriate priorities for outstanding priority port ENC coverage and construction.
 - d. **Use of Raster Charts.** Only after all other options have been exhausted, use raster charts as an interim measure to fill an ENC gap. While there is concern that not all raster chart coverage can be read or displayed in an ECDIS, this option can serve as a

last resort measure until ENCs are available from the HO or via one of the other means noted above

5. If MACHC Member States are unwilling either to distribute ENCs or to have another country produce ENCs for them, the MACHC Chair will inform the IRCC and request that IRCC will take appropriate action with the WEND Working Group, the IHB, and IMO.
6. MICC continue to monitor and update the Region B, Atlantic side, INT Chart scheme for all scales.
7. MICC to develop an INT Chart scheme for all scales for the Pacific side of Region B.
8. As a permanent task, MICC invites all MACHC Member States to provide the MICC with updates to their INT Chart schemes and production plans.
9. MICC encourages Member States to synchronize the release of new (and updated editions) "INT Charts" and "ENCs" as best as possible.
10. MACHC Chair is invited to provide this report to the International Hydrographic Bureau (IHB) as the region's contribution to global (ENC and INT) chart coverage so that it may be conveyed as appropriate to the IMO.

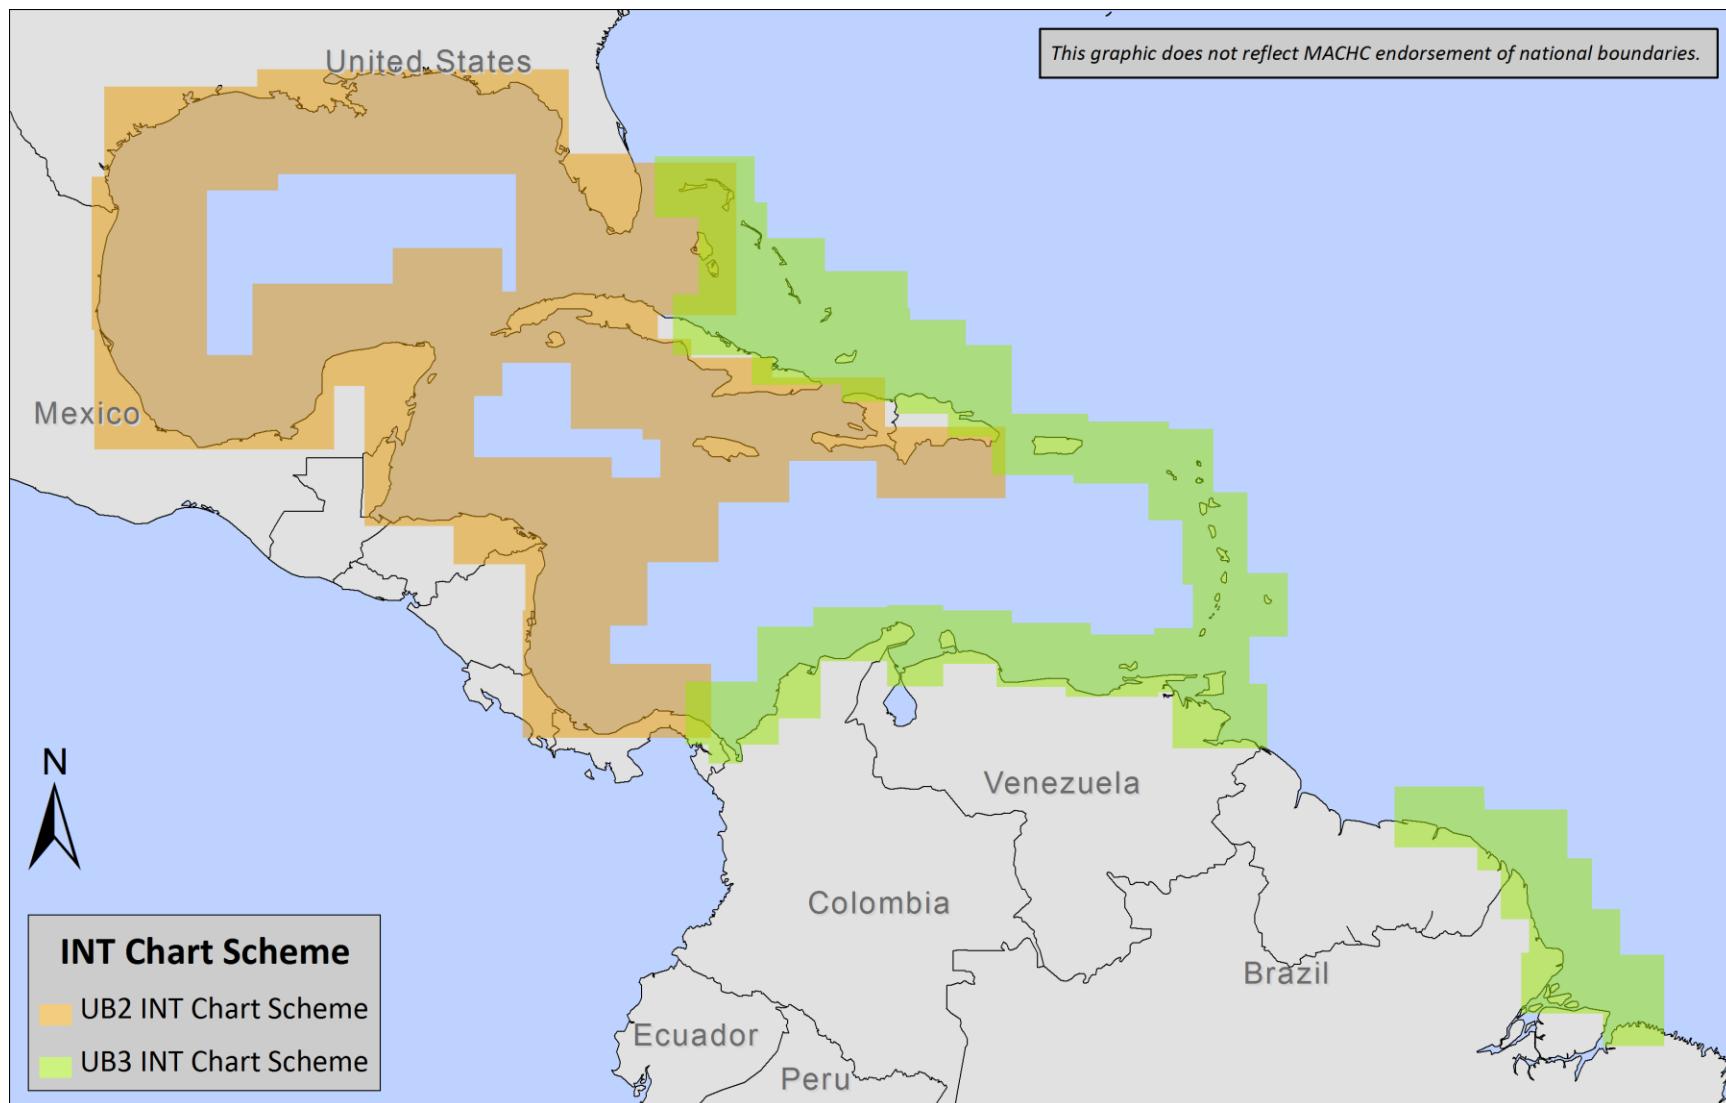

ACTIONS REQUIRED OF THE MACHC

The MICC invites MACHC Member States to note and endorse this report and its recommendations. The MICC also requests that the MACHC Chair then transmit the report to the IHB for final communications as appropriate to the IMO.

ANNEX B.1 – MEMBER STATES’ ACTIONS ADDRESSING GAPS

Responsible Member States	Data Discrepancy/ Usage Band/ Datum Issues	Affected Cells	Status	Status Statement	Completion Date	
UB2 Gaps						
Brazil (UB2)		Gap (area between FR 250010 and BR 221020)	BR221010	Resolved	Already covered by Brazilian Cell BR221010.	
			FR 250010, FR276250	Resolved	The new French cell is available. FR 250010 was withdrawn and replaced by FR276250 and clipped at BR boundaries.	
UB3 Gaps						
Venezuela	Guyana		Charts INT 4102 and INT 4100	Resolved	<p>INT Charts INT 4102 and 4100 to be produced by VE. This means that equivalent cells should logically be produced by VE. ECC/MACHC Chair to propose to VE to produce equivalent ENCs clipped at the FR374840.</p> <p><i>Update 8/23/10: After conferring with France and Venezuela, there is no need to determine where to clip the cells, as they do not touch.</i></p> <p><i>VE to provide ENC cell limits (equivalents of INT Charts INT 4102 and 4100) to Chair ECC.</i></p>	Jun-10
Suriname Fr Guyana	Brazil	Gap (southward from Guyana, including Suriname, Fr Guyana to Brazil)	FR374840 and FR374850. BR321200; BR321300; BR321400 and BR321500	Pending	Covered by FR 374840 and FR374850. Cells will be clipped at the southern boundary of Brazil Cell BR 321100, which is available. France noted that there is an agreement between Brazil and France to address this issue on French Guyana's Coast. No border gap between French and Brazil.	FR cells released in Oct 2010. BR321300 (June 2014) and BR321400 (June 2014) cells to be released. BR321500 (Available)

Responsible Member States		Data Discrepancy/ Usage Band/ Datum Issues	Affected Cells	Status	Status Statement	Completion Date
Colombia		Gap (UB3)	CO200008	Resolved	This cell will cover the gap; no need for a UB 3 cell in that area.	Dec-10
US	Mexico	Gap	US1GC09	Resolved	Covered at scale band 1.	Jun-10
			MX300711	Resolved	Coastal area covered at band 3 by Mexico.	Jun-10
			MX300712	Resolved	Coastal area covered at band 3 by Mexico.	Jun-10
			MX300713	Resolved	Coastal area covered at band 3 by Mexico.	Jun-10
			MX300721	Resolved	Coastal area covered at band 3 by Mexico.	Jun-10
				Resolved	MX will assess if UB1 (US1GC09) would be enough for this gap.	Nov-10
Cuba				Pending	MICC Chair and UKHO representative continue efforts to engage Cuba, including requesting support from MACHC Chair, if necessary. Final solution still pending. 8 new UB3 cells released in 2013. The UK has had some recent contact with Cuba and may be able to meet with Cuba in near future.	Dec-14
UK		Gap Honduran coast		Resolved	Covered by GB201220; GB300513 will cover northwest side of Honduran coast for adequate usage band 3 coverage.	Nov-10
UK		Gap for Haiti		Resolved	Covered by GB281800.	Nov-10
UB4-6 Gaps						
UK/US	Bahamas	Castaway Cay		Pending	Priority Port (Private) used by Disney Cruises	Mar-14
UK/US	Bahamas	Coco Cay (Little Stirrup Cay)		Pending	Priority Port (Private) used by Royal Caribbean Cruises	Mar-14
UK/US	Bahamas	Great Stirrup Cay		Pending	Priority Port (Private) used by Norwegian Cruise Lines	Mar-14
UK/US	Bahamas	Half Moon Cay		Pending	Priority Port (Private) used by Holland American	Mar-14

Responsible Member States		Data Discrepancy/ Usage Band/ Datum Issues	Affected Cells	Status	Status Statement	Completion Date
UK	Bahamas	Princess Cay	GB503912	Resolved	Priority Port (Private) used by Princess Cruises Lines. Planned cell to be released October 2011.	Nov-11
UK	Honduras	Roatan Island	GB50503A	Pending	Location of Coast Guard Station/Cruise Ship Port-of-Call	Dec-13
UK	Honduras	Roatan Island	GB50503B	Pending	Location of Coast Guard Station/Cruise Ship Port-of-Call	Dec-13
UK	Costa Rica	Golfito	GB32493A	Pending	Cargo Port	Jan-14
UK	Costa Rica	Golfito	GB42493B	Pending	Cargo Port	Jan-14
UK	Panama	Charco Azul	GB42493A	Pending	Tanker Port	Jan-14
Venezuela		Boca Grande Terminal	NONE	Pending	Floating iron ore transfer station (largest in the world). Plans for future surveys in conjunction with national oil company.	Jul-14
Venezuela		Matanzas	NONE	Pending	Ocean freight exchange. New survey in early 2012.	Jul-14
Venezuela		Puerto Ordaz	VE509701	Pending	San Felix and Puerto Ordaz are very close to one another, located at the confluence of the Caroni and Orinoco Rivers handling steel and aluminum.	Jul-14
Venezuela		Palua	VE509601/VE509701	Pending	VE509601/VE509701 to be produced	Jul-14
Venezuela		Ciudad Bolivar	VE509311	Pending	VE509311 to be produced	Jul-14
Venezuela		San Felix	VE509601	Pending	San Felix and Puerto Ordaz are very close to one another, located at the confluence of the Caroni and Orinoco Rivers handling steel and aluminum.	Jul-14

ANNEX B.2 – MEMBER STATES’ ACTIONS ADDRESSING OVERLAPS

Affected Member States		Data Discrepancy/ Usage Band/ Datum Issues		Affected Cells	Status	Status Statement	Completion Date
Brazil	France	Overlap	BR221010	FR276250	Resolved	FR 250010 withdrawn and replaced by FR276250 and clipped at BR boundaries; BR221010 available.	Sep-11
Colombia	Venezuela	Overlap	CO3000026	VE300100	Resolved	<p>CO and VE exchanged proposals on suggested ENC boundary limits. At the MACHC XI meeting, a bi-national technical working group was established to address unresolved technical issues and to develop a recommendation for resolution that can be submitted to the higher authorities in each country.</p> <p>Venezuela has suggested that the Technical Group communicate weekly to enable technical progress.</p> <p>Meeting (June) between Colombian and Venezuelan technical experts occurred at MACHC XII meeting. Meeting supposed to occur in March to sign a MOU between two countries.</p>	Jun-12
Mexico	US	Overlap	MX300711	US3GC01M	Resolved	Mexico sent M_Covr limits to US; US made cut to US3GC01M with respect to MX300711 limits and released US3GC01M reflecting new limits.	May 25 2011
UK US Mexico	Cuba	Overlap	Various Cuba cells	Various US, UK, and Mexico cells	Pending	<p>US, UK, and Mexico will propose solution that ECC Chair can send to Cuba for consideration.</p> <p>Once approved and cells are available, solution will be implemented.</p> <p>This is “pending” until discussions with Cuba.</p>	12/2011 See detailed items below

Affected Member States		Data Discrepancy/ Usage Band/ Datum Issues		Affected Cells		Status		Status Statement	Completion Date
Mexico	US	Overlap		MX200900	US2GC12M	Resolved	Mexico sent their proposal to US; US responded with amended proposal. US made the agreed cuts to the new boundaries of the Mexico cell. US2GC12M released, but awaiting release of MX200900. MX cell pending release until further notice of missing Cuba data.		Aug 2011 - US Dec 2011 - MX
UK	US	Overlap		GB281800	US2EC01M	Pending	US provided geographic positions to UK; UK has cut GB cell. US needs to cut US cell to GB limits.		Mar-12
UK	US	Overlap		GB283000	US2EC02M	Resolved	GB283000 cancelled and rebanded as Usage Band 3.		Jan-11
UK	France	Overlap		GB283800	FR250020	Resolved	GB283800 cancelled. FR250020 replaced by FR274750.		May-10
US	UK	Overlap		US2EC01M	GB283000	Resolved	GB283000 cancelled and rebanded as Usage Band 3.		Jan-11
UK	US	Overlap		GB302006	US3PR10M	Resolved	GB302006 cancelled and rebanded as Usage Band 4.		Jan-11
UK	US	Overlap		GB302016	US3PR10M	Resolved	US3PR10M will be clipped to existing limits of GB302016		Mar-12
US	UK	Overlap		GB300472	US3PR10M	Resolved	GB300472 will be clipped to existing limit of US3PR10M.		Mar-12
UK	US	Overlap		GB303910	US3FL30M	Resolved	US3FL30M and GB303910 will be clipped to agreed limit along the axis of longitude 79°20'00"W and latitude 26°00'00"N.		Mar-12
UK	France	Overlap		GB380230	FR352010	Resolved	Overlap is <5m on the ground and so is within tolerance. No further action is required.		Jun-10
UK	US	Overlap		GB402006	US4PR11M	Resolved	US to clip US4PR11M to existing limits of GB402006.		Mar-12
Colombia	UK	Overlap		CO200008	GB200486	Resolved	Colombia produced and released CO200008, UK issued GB200486 to replace GB200486 at the northern border of CO200008.		Spring 2011

Affected Member States		Data Discrepancy/ Usage Band/ Datum Issues		Affected Cells	Status	Status Statement	Completion Date
Colombia	UK	Overlap	CO200008	GB200396	Resolved	Colombia produced and released CO20008, and GB200396 was cancelled.	Spring 2011
US	Mexico	Overlap	US1WC07M	MX100010	Pending	MX and US still negotiating how to cut ENCs.	Jul-14
US	Mexico	Overlap	US1GC09M	MX100030	Pending	US would be willing to cut to MX cell limits.	Jul-14
UK	Mexico	Overlap	GB104802 GB104811	MX100020	Pending	When MX released, GB will be cut back.	Jul-14
MX	Cuba	Overlap	MX200900	CU211401	Resolved	MX and Cuba to cut along 85°W, resolving overlap.	May-12
US	Cuba	Overlap	US2EC01M	CU211401 CU211402 CU211403	Pending	Pending talks between US and Cuba to attempt to resolve prior to release of CU cell.	TBD
Cuba	GB	Overlap	CU211403	GB281800	Pending	TBD	TBD
US	Cuba	Overlap	US3GC07M	CU311423 CU311424 CU311425 CU311426	Resolved	Upon Cuban release, US cut ENCs.	Dec-13
US	Cuba	Overlap	US3FL90M US3FL30M	CU311426	Resolved	Upon Cuban release, US cut ENCs.	Dec-13
US	Cuba	Overlap	US3FL30M	CU311427	Pending	Pending talks between US and Cuba to attempt to resolve prior to release of CU cell.	TBD
UK	Cuba	Overlap	GB303907	CU311534	Pending	TBD	TBD

ANNEX C – WORK PLAN MILESTONES 2013

DELIVERY DATE (2013)	ACTIONS	
	Electronic Chart Activities	INT Chart Activities
January 31	Member States to provide plans to address gaps in ENC coverage within their area.	Member States to provide INT Chart metadata (as noted in S-11) for existing (available) INT Charts for use in GIS
March 6	Member States to provide updates to: <ul style="list-style-type: none"> • the list in Annex A of the Report of available ENCs • resolution of any gaps/overlaps identified in Annex B of the Report. 	Member States to forward INT Chart metadata and shapefiles for “planned” INT Charts
March 13	Hold quarterly conference call to assess status and next steps	
March 27	Complete follow-up activities from Conference Call. Member States to provide all additional information identified during conference call. Develop plan for coordinated Electronic Chart and INT Chart Report.	
April 5		Member States to propose additional coverage/adjustments for S-11, section B
May 3	Complete follow-up activities from Conference Call. Member States to provide all additional information identified during conference call	
May 10	Member States to provide updates to: <ul style="list-style-type: none"> • the list in Annex A of the Report of available ENCs • resolution of any gaps/overlaps identified in Annex B of the Report. 	Member States to provide S-11, section B update to MICC
May 22	Hold quarterly conference call to assess status and prepare information as needed for subsequent communication to IRCC and IHB.	
May 29	Complete follow-up activities from Conference Call. Member States to provide all additional information identified during conference call	
July 1	Develop format for report, reflecting the recently combined INT Chart and Electronic Chart Committees.	
July 5		Add catalog links on the MACHC Committees website
August 1	Member States to review revised WEND Principles and amplifying Annex (Action Item 29)	
August 1	Complete preliminary ‘Draft’ Report	
September 30	Member States to provide updates to: <ul style="list-style-type: none"> • the list in Annex A of the Report of available ENCs • resolution of any gaps/overlaps identified in Annex B of the Report. 	
October 23	Hold quarterly follow-up conference call to update/review and discuss MS input in preparation of 14th MACHC	
November 8	Provide all updates to Leland (for the Annexes of the Report)	

DELIVERY DATE (2013)	ACTIONS	
	Electronic Chart Activities	INT Chart Activities
November 15	All Members provide final comments on the Report to MICC Chair	
November 22	Submit Final Report to MACHC	
Nov/Dec 2013	Seek approval of Final Report at 14th MACHC Meeting	
December 31	MACHC Chair to distribute Final Report of the Status of ENC Coverage for the MACHC Region to the IRCC and IHB	

ANNEX C – WORK PLAN MILESTONES 2012

DELIVERY DATE (2012)	ACTIONS
For all UB 1-6 Band Cells for both Atlantic and Pacific side of MACHC	
January 31	Member States with gaps in coverage to analyze their ENC coverage of Priority Ports based on the IMO Carriage Requirements and associated deadlines for vessel size and traffic.
February 6	Update MCOVR and dates of availability for MACHC Member States (MS) from the RENC/MS for both Atlantic and Pacific side ENC Coverage.
February 13	MS Points of Contact (POC) provide MCOVR data when not available from the RENC
February 17	Distribute updated results (for discussion during Conference Call)
February 29	Explore options for providing a mechanism to depict ENC schemes on a webpage in an interoperable manner
March 21	Hold quarterly conference call, 10:00 EDT (US) to assess status and next steps
March 30	ECC/WG2 Members provide final updates to Annex A and B. (These are updates which could not be 100% confirmed at the March 21 Conference Call)
April 6	Chair, ECC integrates final ECC WG comments into Report
April 12	Chair, ECC sends final draft Report MACHC Chair (for distribution to MACHC Member States)
April 13	MACHC Chair distributes Report to MACHC Member States
April 27	Final Comments on Report due to ECC Chair
May 1	Finalize Report for distribution
May 10	Provide Final Report to MACHC Chair
May 11	MACHC Chair provides Report to IHB
July 1- September 1	Continue communications with WG participants for updates on ENC cells and availability
September 12	Hold quarterly follow-up conference call to review and discuss MS responses to draft of updated Report
October 14	Distribute WG2 Report to MACHC Chair; copy to MACHC National Hydrographers for review and endorsement.
November 2	Comments back to ECC Chair; copy MACHC Chair
November 12	Submit Final Report to MACHC Meeting
December 3-7	Seek approval of Final Report at 13th MACHC Meeting
December 31	MACHC Chair to distribute Final Report of the Status of ENC Coverage for the MACHC Region to the IRCC and IHB

ANNEX C – WORK PLAN MILESTONES 2011

DELIVERY DATE (2011)	ACTIONS	
	For UB 1-3 Band Cells for Pacific side	For UB 4-6 Band Cells for Atlantic side
January 31	Acquire MCOVR for MACHC Member States (MS) from the RENC for Pacific side to develop base polygons representing adequate ENC coverage for Pacific side (Colombia, Mexico, UK, US)	Acquire MCOVR for MACHC Member States (MS) from the RENC for Atlantic side
		Acquire Priority Ports and Routes from WEND ENC WG
January 31	Start data analysis of available M_Covr information	
February 4	MS points of contact (POC) provide MCOVR data when not available from the RENC	
February 15	Distribute results of data analysis (for discussion during conference call)	
February 25	Hold quarterly conference call, 10:00 EST (US) to assess status and next steps	
April 8	Complete the follow-up data analysis	
April 14	Hold quarterly conference call, tentative time 9:00 EDT (US) to assess status and next steps	
May 22	Produce draft Annex to ECC/WG2 ENC coverage report for Pacific ENCs	Produce draft expanded Annex A to ECC/WG2 ENC coverage report for Atlantic ENCs
May 25	Face-to-face meeting (in Niteroi, Brazil, in conjunction with the 9 th CBSC and IRCC-3 meetings) for MS POCs to review, discuss and finalize draft WG2 report on the status of adequate ENC coverage and address any outstanding issues	
June 29	Hold quarterly conference call, tentative time 10:00 EDT (US) to assess status and next steps	
August 26	Expanded draft report sections of addendum to report forwarded to WG members for comment	
September 8	Comments on addendum, and specific comments on annexes, back to Chair and communications coordinator	
September 28	Hold quarterly follow-up conference call to review and discuss MS responses to draft of expanded report	
October 14	Distribute WG2 Report to MACHC Chair; copy to MACHC National Hydrographers for review and endorsement.	
November 4	Comments back to ECC Chair; copy MACHC Chair	
November 16	Submit final report to MACHC	
December 5-9	Seek approval of final report at 12 th MACHC meeting	
December 16	MACHC Chair to distribute final report of the <i>Status of ENC Coverage for the MACHC Region</i> to the IHB	

ANNEX C – WORK PLAN MILESTONES 2010

DELIVERY DATE (2010)	ACTIONS
January 31	Develop base polygons representing adequate ENC coverage derived from medium scale INT scheme.
January 31	Acquire MCovR for MACHC Member States (MS) from the RENC.
January 31	MS points of contact (POC) provide MCovR data when not available from the RENC.
February 24	Hold quarterly conference call, tentative time 10AM EST, to discuss current coverage, gaps, next steps.
March 12	Forward omitted MCovR information so that the graphic properly reflects existing and planned ENC coverage.
April 9	Complete the follow-up data analysis to include the new information.
April 16	Countries receive data analysis results, including targeted guidance on areas of primary focus and action.
May 21	Produce draft of final report. (Start now and supplement with new data analysis as appropriate.)
May 26	Hold quarterly conference call to review WG2 MACHC ENC coverage report outline, tentative time 10 AM EST.
May 28	All countries look at data analysis (provided by UK) and forward any omissions and/or updates to Paul Bradley.
June 1	U.S. populates template, based on UK data analysis, and distributes to countries for consideration.
June 9	Countries respond to data analysis via “reporting template.”
June 16	Face-to-face meeting for MS POCs to review, discuss and finalize draft WG2 report on the status of adequate ENC coverage. Address any outstanding issues.
July 2	Draft sections of report sent to Chair.
August 25	Expanded draft report sent to WG members for comment.
September 8	Comments on report, and specific comments on the annexes, back to technical coordinator and communications coordinator.
September 14	Hold quarterly follow-up conference call to review and discuss MS response to the WG2 Report.
September 20	Distribute WG2 Report to MACHC Chair; copy to MACHC National Hydrographers for review and endorsement.
October 8	Comments back to ECC Chair; copy to MACHC Chair.
October 18	Submit final report to MACHC.
November 8-12	Seek approval of final report at MACHC meeting in Suriname.
December 15	MACHC Chair to distribute final <i>ENC Coverage for the MACHC Region</i> to the IHB.

ANNEX D – GUIDELINES FOR ANALYZING M-COVR IN THE MACHC REGION

1. Assess deficiencies in ENC Coverage for Navigation Purpose 1, 2, and 3 Electronic Navigational Charts (ENC).
 - a. Collect polygon/polygons representing areas lacking Navigation Purpose 1 coverage as defined by the small scale INT Scheme.
 - b. Note any other ENC coverage by other navigation purposes of any Navigation Purpose 1 deficient areas.
 - c. Collect polygon/polygons representing areas lacking Navigation Purpose 2 coverage as defined by the medium scale INT Scheme.
 - d. Note any other ENC coverage by other navigation purposes of any Navigation Purpose 2 deficient areas.
 - e. Collect polygon/polygons representing areas lacking Navigation Purpose 3 coverage as defined by the medium scale INT Scheme.
 - f. Note any other ENC coverage by other navigation purposes of any Navigation Purpose 3 deficient areas.
2. Assess deficiencies in coverage within National ENC suites.
 - a. Identify small gaps or slivers existing between same navigation purpose ENC cells within the same national suite.
 - b. Identify small gaps or slivers existing between same navigation purpose ENC cells that junction with ENCs of other national suites.
3. Identify overlapping areas of same navigation purpose ENC Cells
 - a. Collect polygons representing areas of overlap.
 - b. List affected overlapping cells.
4. Identify any other data anomalies, such as navigation purposes that are inconsistent with the scale of the ENC cell.
5. Prepare a report of all identified data deficiencies for the MACHC region.
 - a. Report all data gaps.
 - b. Report all data overlaps.
 - c. Report all data anomalies.
 - d. Propose recommendations to fix data deficiencies.
