Report of the MACHC INTEGRATED CHART COMMITTEE

INT CHART AND ENC COVERAGE FOR THE MACHC REGION

DECEMBER 2014

INTRODUCTION

The purpose of the Meso American and Caribbean Sea Hydrographic Commission's (MACHC) Integrated Chart Committee (MICC¹) is to provide consistency in the development and maintenance of regional charting schemes, including the monitoring of INT Charts and ENC production, and to promote standardization in International Hydrographic Organization (IHO) charting activities. This is an on-going activity and this report provides the status of these activities.

This Report addresses both INT Chart and ENC activities in one comprehensive report. The Report consists of the introduction plus 3 parts as follows:

1. Section 1-What's New
2. Section 2-INT Charts
3. Section 3-ENCs
4. Section 4- Recommendations

BACKGROUND

Since the 13th MACHC, the former INT Chart Committee and the Electronic Chart Committee were joined into one more encompassing committee. Prior to that time the two committees often met together to coordinate activities. It was considered beneficial to produce both the INT chart and the corresponding ENC either concurrently or at least within as close a time frame as possible. As a number of Member States use automated methods to produce the paper INT chart, producing the companion ENC is a relatively simple task in these instances, especially when compiling small-scale charts.

For a more detailed background, please refer to the December 2013 "Report of the Meso American and Caribbean Sea Hydrographic Commission Integrated Charting Committee" which can be found at:

http://www.ihc-machc.org/documents/micc/MICC_Report_to_Plenary.pdf.

¹ The MICC was formally established in December 2012 at the 13th MACHC in Guatemala. Prior to this time, all INT Chart activities and all ENC activities were conducted by the INT Chart Committee and the Electronic Chart Committee/Working Group 2 respectively.

Although much work has been completed, the Committee's efforts continue until transition to a full "maintenance" stage is achieved. The work plans for the past years are found in Annex C. This past year, the MICC held two conference calls (March 19 and June 19) and one face-to-face meeting on October 5, in conjunction with the Extraordinary International Hydrographic Conference in Monaco. Additionally, a meeting is planned for December 11, 2014 just prior to the MACHC Conference.

Between calls and meetings, participants communicated primarily via e-mail and the new revised MACHC Committees website at <http://www.ihc-machc.org/>, where summary minutes of these calls and meetings can be found.

SECTION 1-What's New

WHAT'S NEW

Risk Assessment:

This year the MICC expanded its scope into the “Risk Assessment” arena. During one of the quarterly MICC Conference calls, the Chair introduced this topic, noting that this had been a subject of discussion at the December 2013 MACHC Conference. The Committee examined both the IALA effort as well as the more sophisticated New Zealand (Vanuatu) model. The IALA effort had provided access to IWRAP (modeling tool useful for maritime risk assessment) information. The findings of both the IALA and the New Zealand projects looked very conspicuous, but require further analysis. It was determined that the IALA Risk Model examined localized, high traffic areas. The MICC plans to look into running such an analysis in some of the MACHC area “choke” points. Although The New Zealand Model is more sophisticated and would conceivably yield improved results, it involves more resources which preclude further exploration at this time. The New Zealand effort was primarily in response to increased Cruise Ship traffic calling on some of the newer island destinations. Figure 1, below shows traffic patterns and the “choke” points within the MACHC.

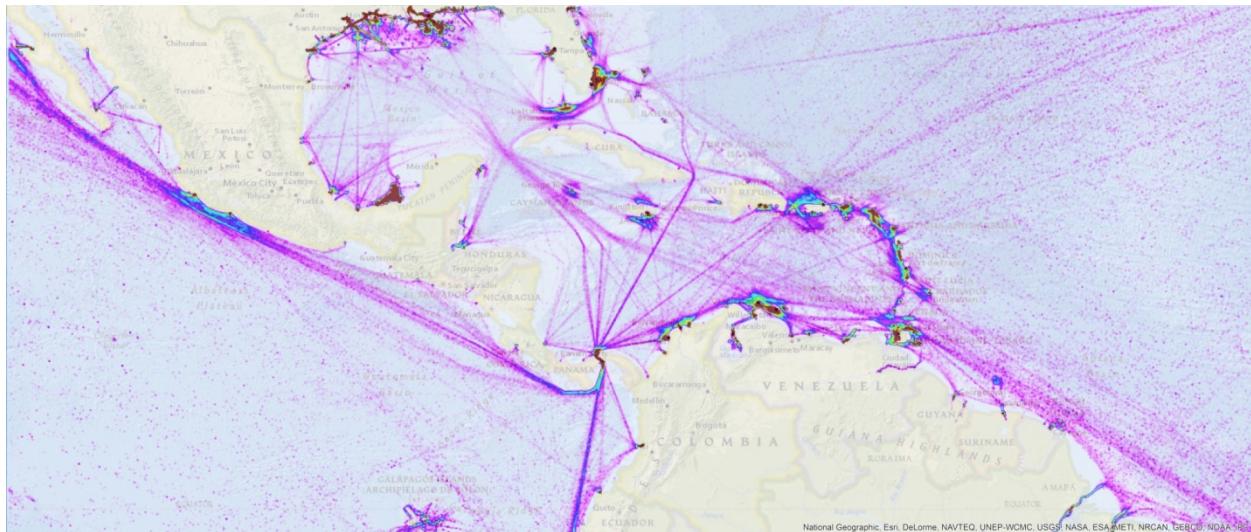

Figure 1

Port Analysis:

In early 2014, the Committee was able to acquire AIS data to help identify ports frequented by a number of cruise vessels. In many of those instances, large scale ENC (Bands 4, 5, and 6) coverage is lacking. Consequently, these ports are now identified as priorities for the production of large-scale Band 4, 5, or 6 ENCs. The graphic shown in Figure 2 below is a sample of an interactive data base which can be queried to provide ship information of the identified ports. A list of Priority Ports is provided as ANNEX D. This will be shared with the Cruise Lines International Association (CLIA) to address these ports.

Figure 2

Regional MACHC ENC On-Line:

The MICC is investigating the potential of implementing an ENC On-line for the MACHC Region. Nautical charts are the most accurate and authoritative coastal ocean maps in the world and often provide the only data set available for ocean research or operations of any kind. This data, particularly vector Electronic Navigational Charts, is not easily available for purposes other than navigation. A MACHC ENC On-line service would provide an easily accessible seamless dataset of charting data for the region. Conceptually this would be cloud based mechanism, where each Member State would be in control of its own data. See Figure 3, below. These ENC's cannot be downloaded with this system.

Implementation of a MACHC ENC On-line would facilitate the secure management of ENC files by the Member State that owns them. For example, only NOAA would be able to submit or remove NOAA ENC files to its secure spot in the cloud, and each country would maintain complete control over its files and .000 data. The ENC On-line application would reference these files for use in the online application. The public would not be able to download any .000 data at any time.

Potential Uses include:

- Fishery Management
- Emergency Response
- Coastal Planning
- Tourism
- Aquaculture
- Environmental Assessment
- Marine Spatial Planning
- Oil and Gas
- Ports
- Recreational mariner

Hydrographic offices around the world collect the best coastal oceanic data. Users of this data by other disciplines would encourage its use beyond navigation.

MACHC ENC On-Line

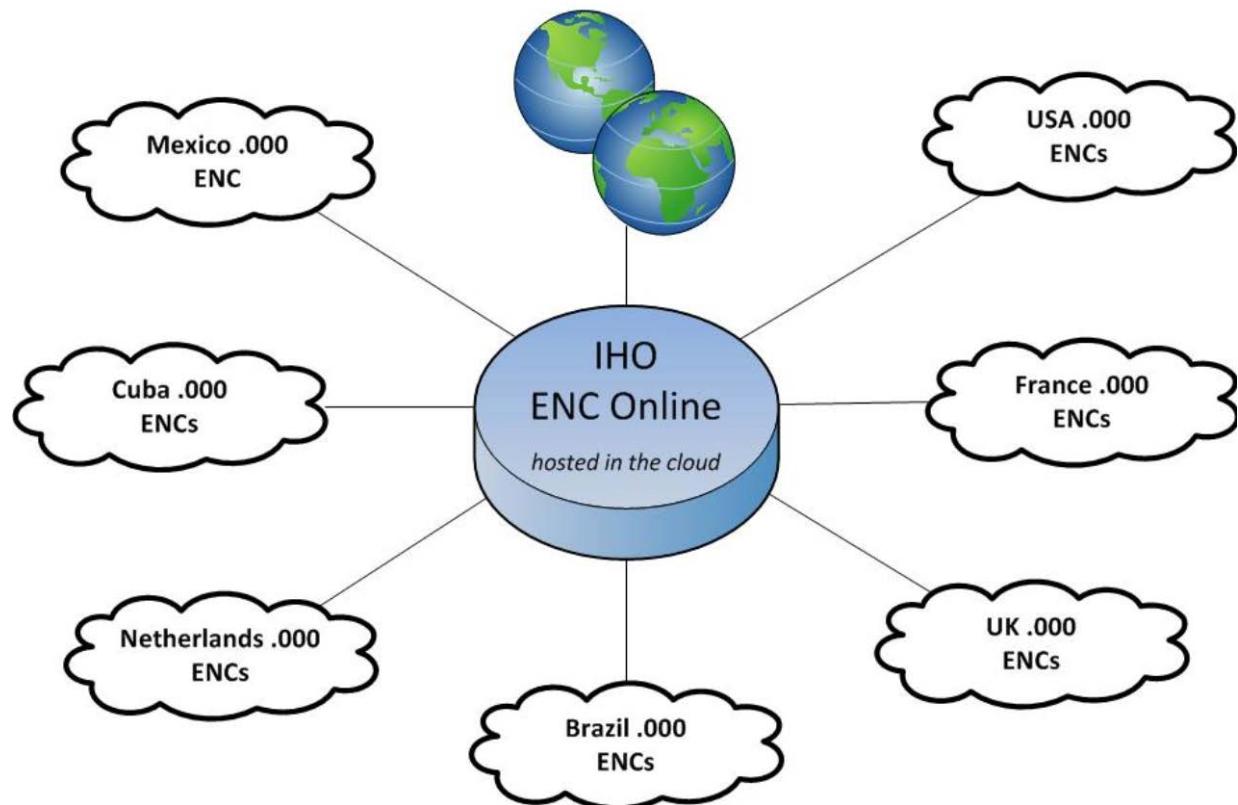

Figure 3

SECTION 2-INT Charts

INTRODUCTION – INT CHARTS

The INT Chart concept is based on potential economies which can be realized if several Hydrographic Offices publishing charts of common regions or ports of interest were to come to an understanding on the reproduction of these charts. The aim is to facilitate the provision of a minimum set of charts suitable for the navigational requirements of international (foreign-going) shipping. Such internationally-conceived charts will also enable those IHO Member States who provide, or wish to provide, charts outside their own national waters, to print by facsimile reproduction selected modern charts under the terms of a bilateral arrangement between the affected Member States.

BACKGROUND

The idea of a common, worldwide chart series (INT Charts) produced to a single set of agreed specifications and standards was adopted by the IHO in 1971. The IHO programme for small scale (1/10 000 000 and 1/3 500 000) INT charts, has been completed and many of the charts at medium and larger scales are in the developmental stages. The Meso American-Caribbean Sea Hydrographic Commission is responsible for the area identified with the green shading on the map at the left. One major task at hand is to complete the identification of those countries who have agreed to produce or distribute charts.

The former INT Chart Committee has always worked very closely with the former Electronic Chart Committee, and now that the two entities have united, the tasks at hand will be handled more efficiently within the MICC.

The MICC considers small and medium-scale INT charts a priority, in parallel with the production of ENCs. Since these tasks are so closely linked, it is imperative that all potential INT Chart “Producer” States be identified in order to develop a coordinated compilation/production schedule.

With the recent development of an INT Chart scheme by Mexico of a significant portion of the Pacific side of the MACHC, identification of “Producer” States, the first goal, is almost complete. The draft of this scheme was already accepted by the 14th MACHC Plenary in 2013 in St Maarten. After a few adjustments, this scheme is now available and has been submitted to the IHO for publication in S-11.

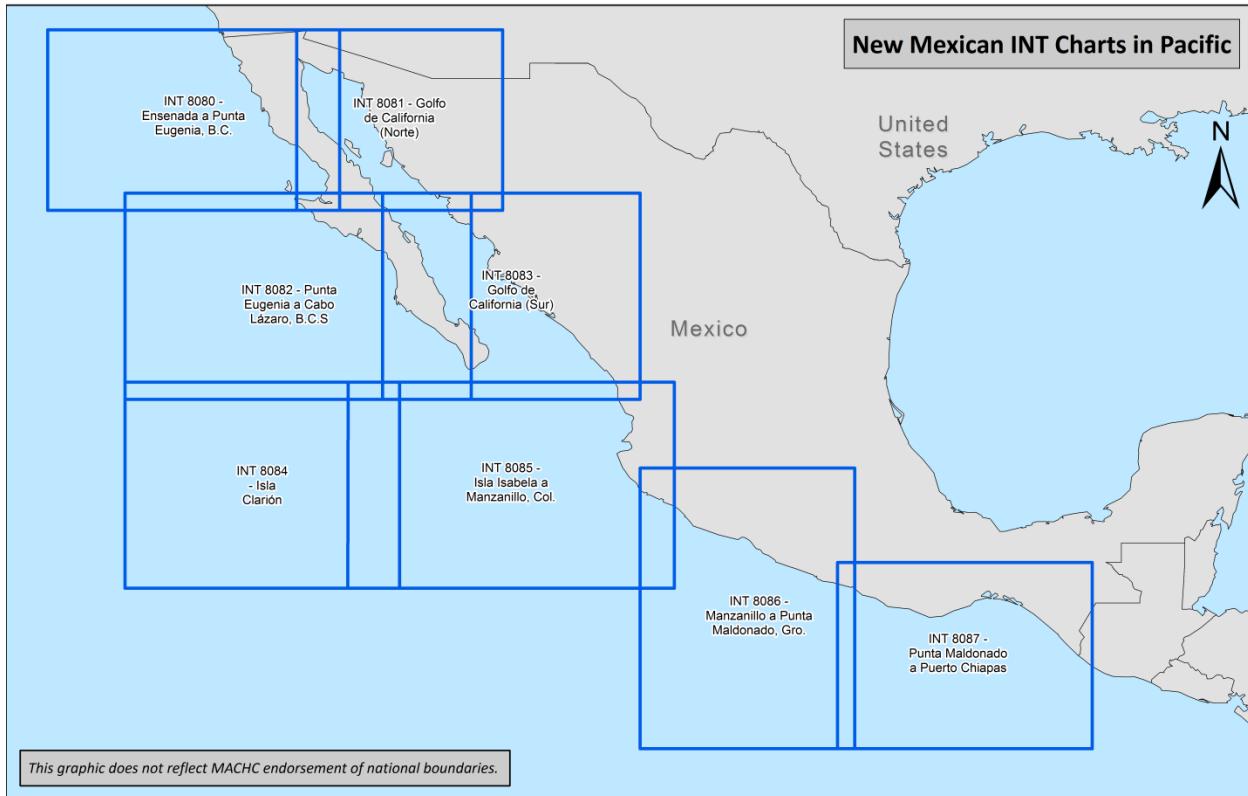

Figure 4

WORK PROCESSES/METHODOLOGIES

The Work Processes and Methodologies are unchanged from previous years and are not repeated here. Please refer to the December 2013 “Report of the Meso American and Caribbean Sea Hydrographic Commission Integrated Charting Committee” for details.

CONCLUSION

The Committee’s goal to identify of “Producer” States continues. Further, the Committee will continue to work to achieve a coordinated schedule for a parallel compilation/production of both INT Charts and ENCs. While the ENC production schedule is available in Annex A of this report, much of the INT Chart production is available in Edition 2.0.4 of Region B of S-11, dated November 2013, posted to the IHO website at: http://www.ihc.int/ihc_pubs/standard/S-11/S-11_PartB_RegionB_e2.0.4.pdf.

SECTION 3-ENCs

INTRODUCTION – ENC

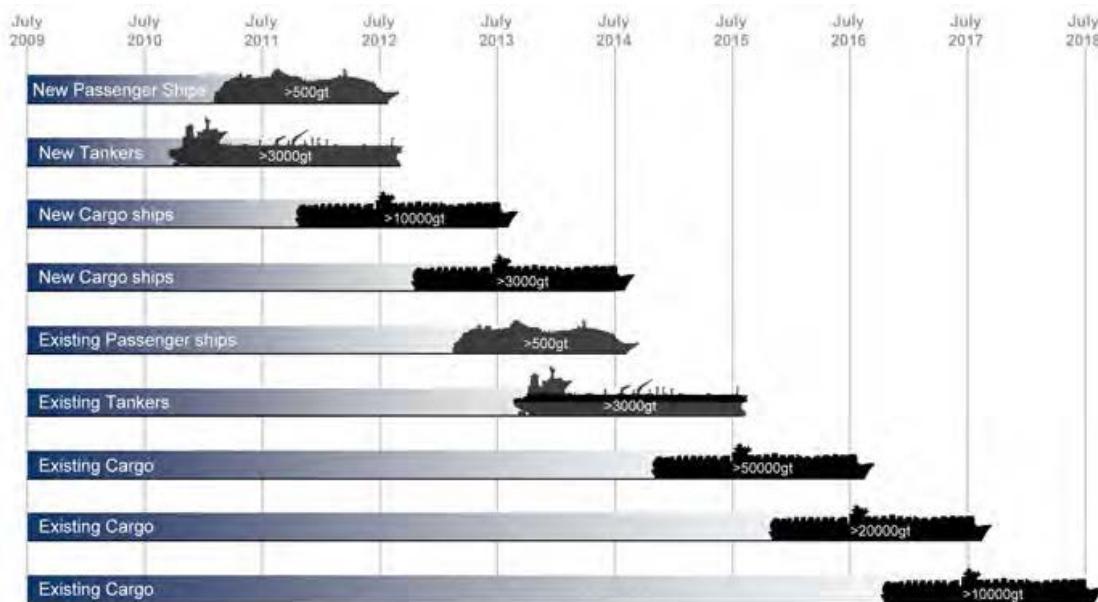

The second and complimentary purpose of the Meso American and Caribbean Sea Hydrographic Commission's (MACHC) Integrated Chart Committee (MICC) is to facilitate the production and promote the availability of official electronic chart data for safe, efficient, and environmentally sensitive maritime navigation within the MACHC Region.

In order to ensure that adequate regional ENC coverage will be available to meet International Maritime Organization (IMO) Electronic Chart Display and Information System (ECDIS) carriage requirements in a timely manner, the MICC was tasked at the 10th MACHC Conference (November 2009, Barbados) to assess ENC coverage and to develop an ENC scheme to ensure adequate ENC coverage by the deadlines set by the International Maritime Organization (IMO).

This report provides further progress and expanded information on the status of ENCs in the MACHC Region. The Report's annexes provide a status of ENC coverage, along with a regional ENC scheme.

BACKGROUND

The primary driver for the development of ENCs resides with the International Maritime Organization announced the six-year timeframe for implementing ECDIS as a carriage requirement for large passenger, tanker, and cargo ships, as shown in the graph below:

Courtesy of UKHO

As the deadline for implementing ECDIS as a carriage requirement for Existing Passenger Ships approaches, the Cruise Industry has become more engaged in the deliberations of the MICC. Since Passenger Vessels will be required to have ECDIS on board, the importance of making ENCs available for the specific Cruise Lines destinations will be essential. Both the Risk Assessment exercise as well as the Port Analysis exercise (noted in the “What’s New” section) has provided useful information to identify needs for future MICC in for planning purposes. Cruise Lines operators have indicated their desire for ENCs for their specific ports of call within the MACHC area and the MICC is making every effort to have the ENCs in place by the IMO deadline.

WORK PLANS AND PROCESS

The Work Processes and Methodologies are unchanged from previous years and are not repeated here. Please refer to the December 2013 “Report of the Meso American and Caribbean Sea Hydrographic Commission Integrated Charting Committee” for details.

CONCLUSIONS

For the Atlantic side, the MICC continued to make progress towards its goal of ensuring adequate regional ENC coverage (Usage Bands 1-6) by the various IMO dates. The MICC established a regional scheme (see Annex A) that shows ENC coverage along with a tabulation of ENC cells and status, based on the format of the paper INT Chart scheme found in Ed. 2.003 of S-11. The tables in Annex A identify ENCs that are currently distributed, as well as the anticipated distribution dates of those not yet available for use by the mariner.

For the Pacific side of the MACHC Region, the MICC developed a similar regional scheme (see Annex A) showing ENC coverage of the Pacific side along with a tabulation of ENC cells and status.

The goal of attaining the total number of ENC cells, as required, by Usage Bands to achieve adequate coverage as per the WEND Principles is getting ever closer. Although this number will achieve adequate coverage within the Region, it should be noted that the Cruise Line Industry has requested several additional large-scale ENC coverage for selected Ports of Call. Several Member States either already have or are planning additional cells to supplement their existing suite of ENCs to improve coverage beyond the “adequate” requirement of the WEND Principles and to satisfy the Cruise Lines. These additional cells are included in the listing of ENCs at Annex A to this report.

The table at right represents a summary of this year’s accomplishments. It should be noted that because 14 cells were withdrawn due to possible duplication and/or overlaps, it reduced the new 2014 increase from 96 cells to a net of 82 new cells for this year.

Newly Available cells in 2014	96
Cells Canceled in 2014	14
Total Cells Available 2013	583
Total Cells Available 2014	665
Net New Cells in 2014	82

The bar graph below provides a snapshot of the significant increase in ENC cells for the MACHC Region.

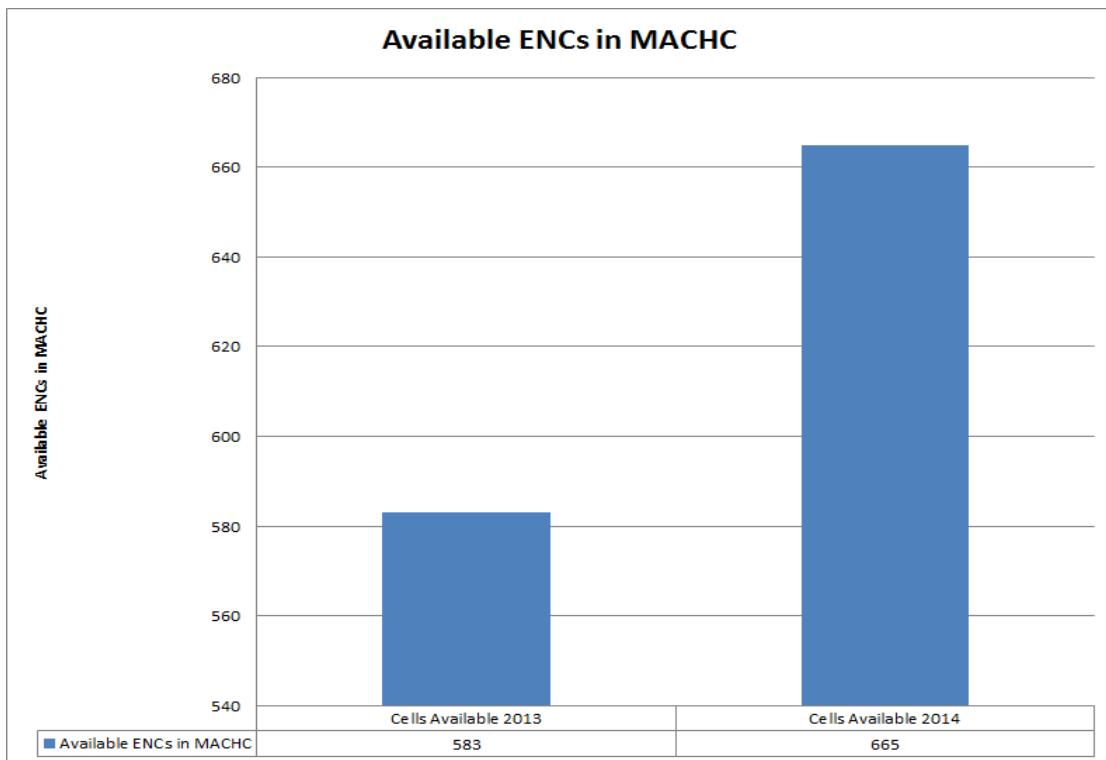

Figure 5

ADEQUATE ENC COVERAGE OF THE ATLANTIC SIDE OF THE REGION BY USAGE BANDS

Usage Band	Total cells	Cells currently available	Cells available by Dec 2014	Cells available by July 2015
Usage Band 1	7	6	6	7
		86%	86%	100%
Usage Band 2	24	19	19	24
		79%	79%	100%
Usage Band 3	106	83	83	106
		78%	78%	100%
Usage Band 4	211	176	182	208
		83%	86%	99%
Usage Band 5	327	263	265	265
		80%	81%	81%
Usage Band 6	19	17	17	18
		89%	89%	95%
All Usage Bands	694	564	572	628
		81%	82%	90%

PACIFIC SIDE

For the Pacific side of the MACHC Region, the MICC developed a similar regional scheme (see Annex A) showing ENC coverage of the Pacific side along with a tabulation of ENC cells and status. The tables in Annex A identify ENCs that are currently distributed, as well as the anticipated distribution dates of those not yet available for use by the mariner.

ADEQUATE ENC COVERAGE OF THE PACIFIC SIDE FOR THE REGION BY USAGE BANDS

Usage Band	Total cells	Cells currently available	Cells available by Dec 2014	Cells available by July 2015
Usage Band 1	7	5	5	7
		71%	71%	100%
Usage Band 2	15	15	15	15
		100%	100%	100%
Usage Band 3	11	10	10	11
		91%	91%	100%
Usage Band 4	25	25	25	25
		100%	100%	100%
Usage Band 5	41	40	40	40
		98%	98%	98%
Usage Band 6	6	6	6	6
		100%	100%	100%
All Usage Bands	105	101	101	104
		96%	96%	99%

When all of the ENCs identified in the scheme are officially distributed, the region will technically meet the definition of “adequate” coverage, i.e., where there is a paper chart, (as identified in the INT Chart footprint) there is a corresponding ENC and all “priority ports” are covered by an ENC. The MICC also examined ENC schemes in adjacent Regional Hydrographic Commissions (Southeast Pacific Hydrographic Commission, Southwest Atlantic Hydrographic Commission, and U.S.-Canada Hydrographic Commission) and ensured that all MACHC ENC cells fit seamlessly with the adjacent schemes.

The MICC further acknowledges that some Member States may encounter circumstances, despite their best intentions, which may preclude them from completing their planned ENC coverage by the due dates. These circumstances may include technical issues, geo-politics, resource constraints, or capacity-building setbacks. Should this situation occur, the MICC developed options to provide potential ENC coverage as a temporary solution at the December 2011 St. Kitts meeting. They are further elaborated in recommendation seven.

SECTION 4-Recommendations

RECOMMENDATIONS

The MICC makes the following recommendations for 2015:

1. MICC continue to monitor and update the Region B, both for the Atlantic and Pacific side, ENC scheme for all Usage Bands, per the timetables indicated in Annex A.
2. As a permanent task, MICC invites all MACHC Member States to provide the MICC with updates to their ENC production plans.
3. In order to create the IHO worldwide ENC database, the MICC encourages all ENC producers to make their ENCs available through Regional Electronic Navigational Chart Coordinating Centers (RENCS), even if they are also distributed by different channels.
4. If Member States are unable to complete their ENC coverage in the designated timeframes, the MACHC, in partnership with appropriate authorities, should pursue options to address this situation, in accordance with the IMO ECDIS Requirements and the WEND principles.
5. MICC continue to monitor and update the Region B INT Chart scheme for all scales for both the Atlantic and Pacific sides.
6. As a permanent task, MICC invites all MACHC Member States to provide the MICC with updates to their INT Chart schemes and production plans.
7. MICC encourages Member States to synchronize the release of new (and updated editions) "INT Charts" and "ENCs" as best as possible.
8. MACHC Chair is invited to provide this report to the International Hydrographic Bureau (IHB) as the region's contribution to global (ENC and INT) chart coverage so that it may be conveyed as appropriate to the IMO.

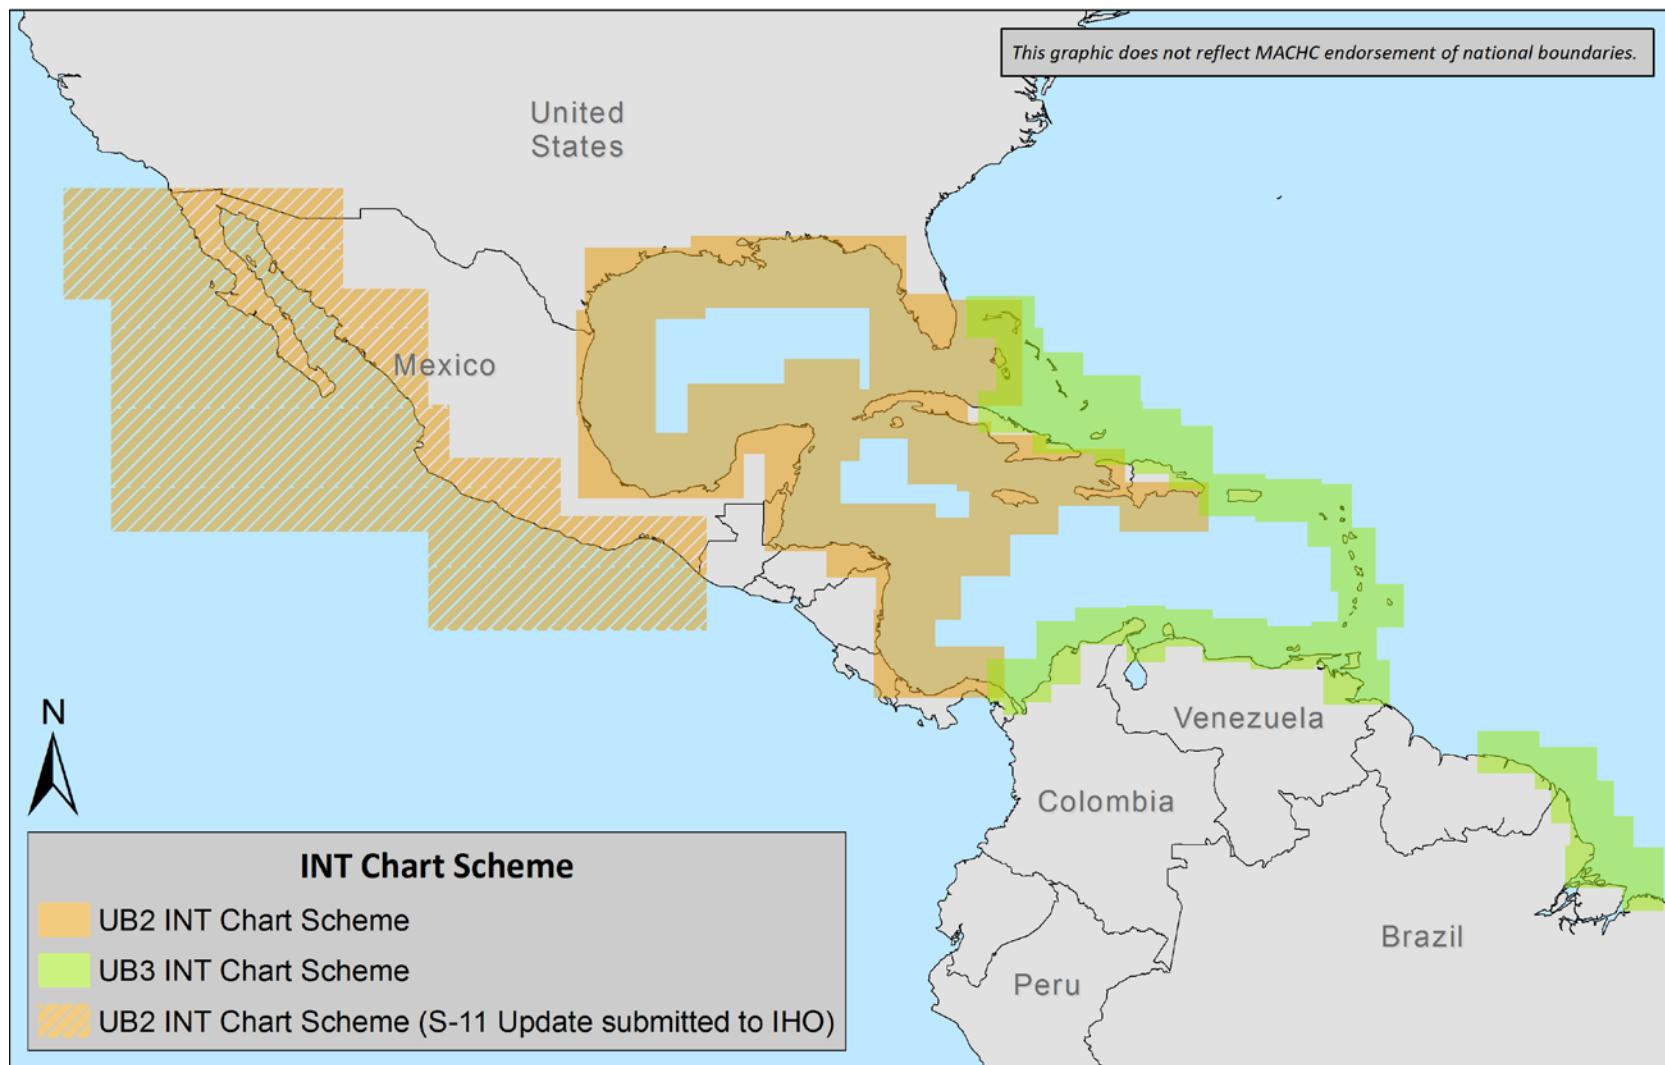

ACTIONS REQUIRED OF THE MACHC

The MICC invites MACHC Member States to note and endorse this report and its recommendations. The MICC also requests that the MACHC Chair then transmit the report to the IHB for final communications as appropriate to the IMO.

ANNEX B.1 – MEMBER STATES’ ACTIONS ADDRESSING GAPS

Responsible Member States	Data Discrepancy/ Usage Band/ Datum Issues	Affected Cells	Status	Status Statement	Completion Date	
UB2 Gaps						
Brazil (UB2)		Gap (area between FR 250010 and BR 221020)	BR221010	Resolved	Already covered by Brazilian Cell BR221010.	
			FR 250010, FR276250	Resolved	The new French cell is available. FR 250010 was withdrawn and replaced by FR276250 and clipped at BR boundaries.	
UB3 Gaps						
Venezuela	Guyana		Charts INT 4102 and INT 4100	Resolved	<p>INT Charts INT 4102 and 4100 to be produced by VE. This means that equivalent cells should logically be produced by VE. ECC/MACHC Chair to propose to VE to produce equivalent ENCs clipped at the FR374840.</p> <p><i>Update 8/23/10: After conferring with France and Venezuela, there is no need to determine where to clip the cells, as they do not touch.</i></p> <p><i>VE to provide ENC cell limits (equivalents of INT Charts INT 4102 and 4100) to Chair ECC.</i></p>	Jun-10
Suriname Fr Guyana	Brazil	Gap (southward from Guyana, including Suriname, Fr Guyana to Brazil)	FR374840 and FR374850. BR321200; BR321300; BR321400 and BR321500	Pending	Covered by FR 374840 and FR374850. Cells will be clipped at the southern boundary of Brazil Cell BR 321100, which is available. France noted that there is an agreement between Brazil and France to address this issue on French Guyana's Coast. No border gap between French and Brazil.	FR cells released in Oct 2010. BR321300 (June 2014) and BR321400 (June 2014) cells to be released. BR321500 (Available)

Responsible Member States		Data Discrepancy/ Usage Band/ Datum Issues	Affected Cells	Status	Status Statement	Completion Date
Colombia		Gap (UB3)	CO200008	Resolved	This cell will cover the gap; no need for a UB 3 cell in that area.	Dec-10
US	Mexico	Gap	US1GC09	Resolved	Covered at scale band 1.	Jun-10
			MX300711	Resolved	Coastal area covered at band 3 by Mexico.	Jun-10
			MX300712	Resolved	Coastal area covered at band 3 by Mexico.	Jun-10
			MX300713	Resolved	Coastal area covered at band 3 by Mexico.	Jun-10
			MX300721	Resolved	Coastal area covered at band 3 by Mexico.	Jun-10
				Resolved	MX will assess if UB1 (US1GC09) would be enough for this gap.	Nov-10
Cuba				Pending	MICC Chair and UKHO representative continue efforts to engage Cuba, including requesting support from MACHC Chair, if necessary. Final solution still pending. 8 new UB3 cells released in 2013. The UK has had some recent contact with Cuba and may be able to meet with Cuba in near future.	Dec-15
UK		Gap Honduran coast		Resolved	Covered by GB201220; GB300513 will cover northwest side of Honduran coast for adequate usage band 3 coverage.	Nov-10
UK		Gap for Haiti		Resolved	Covered by GB281800.	Nov-10
UB4-6 Gaps						
UK/US	Bahamas	Castaway Cay		Pending	Priority Port (Private) used by Disney Cruises	Mar-15
UK/US	Bahamas	Coco Cay (Little Stirrup Cay)		Pending	Priority Port (Private) used by Royal Caribbean Cruises	Mar-15
UK/US	Bahamas	Great Stirrup Cay		Pending	Priority Port (Private) used by Norwegian Cruise Lines	Mar-15
UK/US	Bahamas	Half Moon Cay		Pending	Priority Port (Private) used by Holland American	Mar-15

Responsible Member States		Data Discrepancy/ Usage Band/ Datum Issues	Affected Cells	Status	Status Statement	Completion Date
UK	Bahamas	Princess Cay	GB503912	Resolved	Priority Port (Private) used by Princess Cruises Lines. Planned cell to be released October 2011.	Nov-11
UK	Honduras	Roatan Island	GB50503A	Pending	Location of Coast Guard Station/Cruise Ship Port-of-Call	Dec-13
UK	Honduras	Roatan Island	GB50503B	Pending	Location of Coast Guard Station/Cruise Ship Port-of-Call	Dec-13
UK	Costa Rica	Golfito	GB32493A	Resolved	Cargo Port	Jan-14
UK	Costa Rica	Golfito	GB42493B	Resolved	Cargo Port	Jan-14
UK	Panama	Charco Azul	GB42493A	Resolved	Tanker Port	Jan-14
Venezuela		Boca Grande Terminal	NONE	Pending	Floating iron ore transfer station (largest in the world). Plans for future surveys in conjunction with national oil company.	Jul-15
Venezuela		Matanzas	NONE	Pending	Ocean freight exchange. New survey in early 2012.	Jul-15
Venezuela		Puerto Ordaz	VE509701	Pending	San Felix and Puerto Ordaz are very close to one another, located at the confluence of the Caroni and Orinoco Rivers handling steel and aluminum.	Jul-15
Venezuela		Palua	VE509601/VE509701	Pending	VE509601/VE509701 to be produced	Jul-15
Venezuela		Ciudad Bolivar	VE509311	Pending	VE509311 to be produced	Jul-15
Venezuela		San Felix	VE509601	Pending	San Felix and Puerto Ordaz are very close to one another, located at the confluence of the Caroni and Orinoco Rivers handling steel and aluminum.	Jul-15

ANNEX B.2 – MEMBER STATES’ ACTIONS ADDRESSING OVERLAPS

Affected Member States		Data Discrepancy/ Usage Band/ Datum Issues	Affected Cells		Status	Status Statement	Completion Date
Brazil	France	Overlap	BR221010	FR276250	Resolved	FR 250010 withdrawn and replaced by FR276250 and clipped at BR boundaries; BR221010 available.	Sep-11
Colombia	Venezuela	Overlap	CO3000026	VE300100	Resolved	<p>CO and VE exchanged proposals on suggested ENC boundary limits. At the MACHC XI meeting, a bi-national technical working group was established to address unresolved technical issues and to develop a recommendation for resolution that can be submitted to the higher authorities in each country.</p> <p>Venezuela has suggested that the Technical Group communicate weekly to enable technical progress.</p> <p>Meeting (June) between Colombian and Venezuelan technical experts occurred at MACHC XII meeting. Meeting supposed to occur in March to sign a MOU between two countries.</p>	Jun-12
Mexico	US	Overlap	MX300711	US3GC01M	Resolved	Mexico sent M_Covr limits to US; US made cut to US3GC01M with respect to MX300711 limits and released US3GC01M reflecting new limits.	May 25 2011
UK US Mexico	Cuba	Overlap	Various Cuba cells	Various US, UK, and Mexico cells	Pending	<p>US, UK, and Mexico will propose solution that ECC Chair can send to Cuba for consideration.</p> <p>Once approved and cells are available, solution will be implemented.</p> <p>This is “pending” until discussions with Cuba.</p>	12/2011 See detailed items below

Affected Member States		Data Discrepancy/ Usage Band/ Datum Issues		Affected Cells		Status		Status Statement	Completion Date
Mexico	US	Overlap	MX200900	US2GC12M	Resolved			Mexico sent their proposal to US; US responded with amended proposal. US made the agreed cuts to the new boundaries of the Mexico cell. US2GC12M released, but awaiting release of MX200900. MX cell pending release until further notice of missing Cuba data.	Aug 2011 - US Dec 2011 - MX
UK	US	Overlap	GB281800	US2EC01M	Pending			US provided geographic positions to UK; UK has cut GB cell. US needs to cut US cell to GB limits.	Mar-12
UK	US	Overlap	GB283000	US2EC02M	Resolved			GB283000 cancelled and rebanded as Usage Band 3.	Jan-11
UK	France	Overlap	GB283800	FR250020	Resolved			GB283800 cancelled. FR250020 replaced by FR274750.	May-10
US	UK	Overlap	US2EC01M	GB283000	Resolved			GB283000 cancelled and rebanded as Usage Band 3.	Jan-11
UK	US	Overlap	GB302006	US3PR10M	Resolved			GB302006 cancelled and rebanded as Usage Band 4.	Jan-11
UK	US	Overlap	GB302016	US3PR10M	Resolved			US3PR10M will be clipped to existing limits of GB302016	Mar-12
US	UK	Overlap	GB300472	US3PR10M	Resolved			GB300472 will be clipped to existing limit of US3PR10M.	Mar-12
UK	US	Overlap	GB303910	US3FL30M	Resolved			US3FL30M and GB303910 will be clipped to agreed limit along the axis of longitude 79°20'00"W and latitude 26°00'00"N.	Mar-12
UK	France	Overlap	GB380230	FR352010	Resolved			Overlap is <5m on the ground and so is within tolerance. No further action is required.	Jun-10
UK	US	Overlap	GB402006	US4PR11M	Resolved			US to clip US4PR11M to existing limits of GB402006.	Mar-12
Colombia	UK	Overlap	CO200008	GB200486	Resolved			Colombia produced and released CO200008, UK issued GB200486 to replace GB200486 at the northern border of CO200008.	Spring 2011

Affected Member States		Data Discrepancy/ Usage Band/ Datum Issues		Affected Cells	Status	Status Statement	Completion Date
Colombia	UK	Overlap	CO200008	GB200396	Resolved	Colombia produced and released CO20008, and GB200396 was cancelled.	Spring 2011
US	Mexico	Overlap	US1WC07M	MX100010	Pending	MX and US still negotiating how to cut ENCs.	Jul-14
US	Mexico	Overlap	US1GC09M	MX100030	Pending	US would be willing to cut to MX cell limits.	Jul-14
UK	Mexico	Overlap	GB104802 GB104811	MX100020	Pending	When MX released, GB will be cut back.	Jul-14
MX	Cuba	Overlap	MX200900	CU211401	Resolved	MX and Cuba to cut along 85°W, resolving overlap.	May-12
US	Cuba	Overlap	US2EC01M	CU211401 CU211402 CU211403	Pending	Pending talks between US and Cuba to attempt to resolve prior to release of CU cell.	TBD
Cuba	GB	Overlap	CU211403	GB281800	Pending	TBD	TBD
US	Cuba	Overlap	US3GC07M	CU311423 CU311424 CU311425 CU311426	Resolved	Upon Cuban release, US cut ENCs.	Dec-13
US	Cuba	Overlap	US3FL90M US3FL30M	CU311426	Resolved	Upon Cuban release, US cut ENCs.	Dec-13
US	Cuba	Overlap	US3FL30M	CU311427	Pending	Pending talks between US and Cuba to attempt to resolve prior to release of CU cell.	TBD
UK	Cuba	Overlap	GB303907	CU311534	Pending	TBD	TBD

ANNEX C – WORK PLAN MILESTONES 2014

DELIVERY DATE (2014)	ACTIONS	
	Electronic Chart Activities	INT Chart Activities
January 31	Member States continue to provide plans to address gaps in ENC coverage within their area.	Member States continue to provide INT Chart metadata (as noted in S-11) for existing (available) INT Charts for use in GIS
March 6	In preparation for the quarterly Conference Call, Member States to provide updates to: <ul style="list-style-type: none"> • the list in Annex A of the Report of available ENCs • resolution of any gaps/overlaps identified in Annex B of the Report. 	In preparation for the quarterly Conference Call, Member States to forward INT Chart metadata and shapefiles for “planned” INT Charts. Member States to propose additional coverage/adjustments for S-11, section B
March 19	Hold quarterly conference call to assess status and next steps	
March 31	Agree on a Risk Assessment methodology.	
April 11	Complete follow-up activities from Conference Call. Member States to provide all additional information identified during conference call.	
May 10	In preparation for the quarterly Conference Call, Member States to provide updates to: <ul style="list-style-type: none"> • the list in Annex A of the Report of available ENCs • resolution of any gaps/overlaps identified in Annex B of the Report. 	In preparation for the quarterly Conference Call, Member States to forward INT Chart metadata and shapefiles for “planned” INT Charts. Member States to propose additional coverage/adjustments for S-11, section B update to MICC
June 18	Hold quarterly conference call to assess status and prepare information as needed for subsequent communication to IRCC and IHB.	
July 11	Complete follow-up activities from Conference Call. Member States to provide all additional information identified during conference call	
August 1		MS to forward S-11 updates to MICC technical coordinator for incorporation into Region B, S-11 to IHB, to include new Pacific INT scheme.
August 22		MICC technical coordinator to forward S-11 updates to IHB, to include Pacific INT scheme.
September 26	Provide initial draft of Report for review at the next Conference Call	
September 30	In preparation for the quarterly Conference Call, Member States to provide updates to: <ul style="list-style-type: none"> • the list in Annex A of the Report of available ENCs • resolution of any gaps/overlaps identified in Annex B of the Report. 	In preparation for the quarterly Conference Call, Member States to forward INT Chart metadata and shapefiles for “planned” INT Charts. Member States to propose additional coverage/adjustments for S-11, section B update to MICC

DELIVERY DATE (2014)	ACTIONS	
	Electronic Chart Activities	INT Chart Activities
	B of the Report.	for S-11, section B update to MICC
October 8 October 22	Hold quarterly follow-up conference call to update/review and discuss MS input in preparation of 15th MACHC	
November 7	Complete follow-up activities from Conference Call. Member States to provide all additional information identified during conference call	
November 7	Provide all updates to Leland (for the Annexes of the Report)	
November 14	All Members provide final comments on the Report to MICC Chair	
November 21	Submit Final Report to MACHC	
Nov/Dec 2014	Seek approval of Final Report at 15 th MACHC Meeting	
December 31	MACHC Chair to distribute Final Report of the Status of ENC Coverage for the MACHC Region to the IRCC and IHB	

ANNEX C – WORK PLAN MILESTONES 2013

DELIVERY DATE (2013)	ACTIONS	
	Electronic Chart Activities	INT Chart Activities
January 31	Member States to provide plans to address gaps in ENC coverage within their area.	Member States to provide INT Chart metadata (as noted in S-11) for existing (available) INT Charts for use in GIS
March 6	Member States to provide updates to: <ul style="list-style-type: none"> • the list in Annex A of the Report of available ENCs • resolution of any gaps/overlaps identified in Annex B of the Report. 	Member States to forward INT Chart metadata and shapefiles for “planned” INT Charts
March 13	Hold quarterly conference call to assess status and next steps	
March 27	Complete follow-up activities from Conference Call. Member States to provide all additional information identified during conference call. Develop plan for coordinated Electronic Chart and INT Chart Report.	
April 5		Member States to propose additional coverage/adjustments for S-11, section B
May 3	Complete follow-up activities from Conference Call. Member States to provide all additional information identified during conference call	
May 10	Member States to provide updates to: <ul style="list-style-type: none"> • the list in Annex A of the Report of available ENCs • resolution of any gaps/overlaps identified in Annex B of the Report. 	Member States to provide S-11, section B update to MICC
May 22	Hold quarterly conference call to assess status and prepare information as needed for subsequent communication to IRCC and IHB.	
May 29	Complete follow-up activities from Conference Call. Member States to provide all additional information identified during conference call	
July 1	Develop format for report, reflecting the recently combined INT Chart and Electronic Chart Committees.	
July 5		Add catalog links on the MACHC Committees website
August 1	Member States to review revised WEND Principles and amplifying Annex (Action Item 29)	
August 1	Complete preliminary ‘Draft’ Report	
September 30	Member States to provide updates to: <ul style="list-style-type: none"> • the list in Annex A of the Report of available ENCs • resolution of any gaps/overlaps identified in Annex B of the Report. 	
October 23	Hold quarterly follow-up conference call to update/review and discuss MS input in preparation of 14th MACHC	
November 8	Provide all updates to Leland (for the Annexes of the Report)	

DELIVERY DATE (2013)	ACTIONS	
	Electronic Chart Activities	INT Chart Activities
November 15	All Members provide final comments on the Report to MICC Chair	
November 22	Submit Final Report to MACHC	
Nov/Dec 2013	Seek approval of Final Report at 14th MACHC Meeting	
December 31	MACHC Chair to distribute Final Report of the Status of ENC Coverage for the MACHC Region to the IRCC and IHB	

ANNEX C – WORK PLAN MILESTONES 2012

DELIVERY DATE (2012)	ACTIONS
For all UB 1-6 Band Cells for both Atlantic and Pacific side of MACHC	
January 31	Member States with gaps in coverage to analyze their ENC coverage of Priority Ports based on the IMO Carriage Requirements and associated deadlines for vessel size and traffic.
February 6	Update MCOVR and dates of availability for MACHC Member States (MS) from the RENC/MS for both Atlantic and Pacific side ENC Coverage.
February 13	MS Points of Contact (POC) provide MCOVR data when not available from the RENC
February 17	Distribute updated results (for discussion during Conference Call)
February 29	Explore options for providing a mechanism to depict ENC schemes on a webpage in an interoperable manner
March 21	Hold quarterly conference call, 10:00 EDT (US) to assess status and next steps
March 30	ECC/WG2 Members provide final updates to Annex A and B. (These are updates which could not be 100% confirmed at the March 21 Conference Call)
April 6	Chair, ECC integrates final ECC WG comments into Report
April 12	Chair, ECC sends final draft Report MACHC Chair (for distribution to MACHC Member States)
April 13	MACHC Chair distributes Report to MACHC Member States
April 27	Final Comments on Report due to ECC Chair
May 1	Finalize Report for distribution
May 10	Provide Final Report to MACHC Chair
May 11	MACHC Chair provides Report to IHB
July 1-September 1	Continue communications with WG participants for updates on ENC cells and availability
September 12	Hold quarterly follow-up conference call to review and discuss MS responses to draft of updated Report
October 14	Distribute WG2 Report to MACHC Chair; copy to MACHC National Hydrographers for review and endorsement.
November 2	Comments back to ECC Chair; copy MACHC Chair
November 12	Submit Final Report to MACHC Meeting
December 3-7	Seek approval of Final Report at 13th MACHC Meeting
December 31	MACHC Chair to distribute Final Report of the Status of ENC Coverage for the MACHC Region to the IRCC and IHB

ANNEX C – WORK PLAN MILESTONES 2011

DELIVERY DATE (2011)	ACTIONS	
	For UB 1-3 Band Cells for Pacific side	For UB 4-6 Band Cells for Atlantic side
January 31	Acquire MCOVR for MACHC Member States (MS) from the RENC for Pacific side to develop base polygons representing adequate ENC coverage for Pacific side (Colombia, Mexico, UK, US)	Acquire MCOVR for MACHC Member States (MS) from the RENC for Atlantic side
		Acquire Priority Ports and Routes from WEND ENC WG
January 31	Start data analysis of available M_Covr information	
February 4	MS points of contact (POC) provide MCOVR data when not available from the RENC	
February 15	Distribute results of data analysis (for discussion during conference call)	
February 25	Hold quarterly conference call, 10:00 EST (US) to assess status and next steps	
April 8	Complete the follow-up data analysis	
April 14	Hold quarterly conference call, tentative time 9:00 EDT (US) to assess status and next steps	
May 22	Produce draft Annex to ECC/WG2 ENC coverage report for Pacific ENCs	Produce draft expanded Annex A to ECC/WG2 ENC coverage report for Atlantic ENCs
May 25	Face-to-face meeting (in Niteroi, Brazil, in conjunction with the 9 th CBSC and IRCC-3 meetings) for MS POCs to review, discuss and finalize draft WG2 report on the status of adequate ENC coverage and address any outstanding issues	
June 29	Hold quarterly conference call, tentative time 10:00 EDT (US) to assess status and next steps	
August 26	Expanded draft report sections of addendum to report forwarded to WG members for comment	
September 8	Comments on addendum, and specific comments on annexes, back to Chair and communications coordinator	
September 28	Hold quarterly follow-up conference call to review and discuss MS responses to draft of expanded report	
October 14	Distribute WG2 Report to MACHC Chair; copy to MACHC National Hydrographers for review and endorsement.	
November 4	Comments back to ECC Chair; copy MACHC Chair	
November 16	Submit final report to MACHC	
December 5-9	Seek approval of final report at 12 th MACHC meeting	
December 16	MACHC Chair to distribute final report of the <i>Status of ENC Coverage for the MACHC Region</i> to the IHB	

ANNEX C – WORK PLAN MILESTONES 2010

DELIVERY DATE (2010)	ACTIONS
January 31	Develop base polygons representing adequate ENC coverage derived from medium scale INT scheme.
January 31	Acquire MCovR for MACHC Member States (MS) from the RENC.
January 31	MS points of contact (POC) provide MCovR data when not available from the RENC.
February 24	Hold quarterly conference call, tentative time 10AM EST, to discuss current coverage, gaps, next steps.
March 12	Forward omitted MCovR information so that the graphic properly reflects existing and planned ENC coverage.
April 9	Complete the follow-up data analysis to include the new information.
April 16	Countries receive data analysis results, including targeted guidance on areas of primary focus and action.
May 21	Produce draft of final report. (Start now and supplement with new data analysis as appropriate.)
May 26	Hold quarterly conference call to review WG2 MACHC ENC coverage report outline, tentative time 10 AM EST.
May 28	All countries look at data analysis (provided by UK) and forward any omissions and/or updates to Paul Bradley.
June 1	U.S. populates template, based on UK data analysis, and distributes to countries for consideration.
June 9	Countries respond to data analysis via “reporting template.”
June 16	Face-to-face meeting for MS POCs to review, discuss and finalize draft WG2 report on the status of adequate ENC coverage. Address any outstanding issues.
July 2	Draft sections of report sent to Chair.
August 25	Expanded draft report sent to WG members for comment.
September 8	Comments on report, and specific comments on the annexes, back to technical coordinator and communications coordinator.
September 14	Hold quarterly follow-up conference call to review and discuss MS response to the WG2 Report.
September 20	Distribute WG2 Report to MACHC Chair; copy to MACHC National Hydrographers for review and endorsement.
October 8	Comments back to ECC Chair; copy to MACHC Chair.
October 18	Submit final report to MACHC.
November 8-12	Seek approval of final report at MACHC meeting in Suriname.
December 15	MACHC Chair to distribute final <i>ENC Coverage for the MACHC Region</i> to the IHB.
