

# NIOHC Capacity Building Update

*Presented by UKHO*

# NIOHC CB

In this short presentation I will cover the following topics:-

- The activities completed in 2015
- The NIOHC CB Plan 2013 to 2017
- The endorsed activities for 2016
- The proposed activities for 2017

# Activities Completed in 2015

## Technical visits

None requested

## Training Courses

*Bangladesh and Sri Lanka* both benefited from a one week MBES Processing training course

# Activities Completed in 2015

## Training Courses

A one week Introduction to MBES  
Operations course in conjunction with the  
IIC Academy

Held in Visakhapatnam, India, 09-13  
February 2015

The following NIOHC members benefited:-  
*Bangladesh, Egypt, Seychelles, Mauritius,  
Myanmar and Oman*

# Activities Not Completed in 2015

ENC QA training course was funded but not delivered in 2015

To maximise on resources this course will now be run in conjunction with the RSAHC who have a similar course funded

Venue will be Abu Dhabi, sometime in September 2016

# NIOHC CB Plan 2013-2017

INTERNATIONAL HYDROGRAPHIC ORGANIZATION  
NORTH INDIAN OCEAN HYDROGRAPHIC COMMISSION

## CAPACITY BUILDING PLAN Programme document for the period 2013-2017

### 1. INTRODUCTION

#### 1.1. Rationale

The Indian Ocean provides major sea routes connecting the Middle East, Africa, and East Asia with Europe and the Americas. It carries a particularly heavy traffic of petroleum and petroleum products from the oilfields of the Persian Gulf and Indonesia. Its fish are of great and growing importance to the bordering countries for domestic consumption and export. Fishing fleets from Russia, Japan, South Korea, and Taiwan also exploit the Indian Ocean, mainly for shrimp and tuna. Large reserves of hydrocarbons are being tapped in the offshore areas of Saudi Arabia, Iran and India. An estimated 40% of the world's offshore oil production comes from the Indian Ocean. Beach sands rich in heavy minerals and offshore placer deposits are actively exploited by bordering countries, particularly India, Indonesia, Sri Lanka, and Thailand. For these reasons, it is crucial that SOLAS contracting Governments undertake hydrographic surveys as and when required, that they arrange for the compilation and publication of hydrographic data, the dissemination and keeping up to date of all nautical information necessary for safe navigation.

The IHO Capacity Building Strategy classifies the development of hydrographic services into three phases:

- those which are in Phase 1: Collection and circulation of nautical information, necessary to maintain existing charts and publications up to date;
- those which are in Phase 2: Creation of a surveying capability to conduct coastal and offshore projects; and
- those which are in Phase 3: Produce paper charts, ENC and publications independently.

Coastal/maritime states have certain treaty obligations (SOLAS) placed on them and the IHO/NIOHC effort aims at assisting states in meeting these obligations. To achieve this a national understanding and coordination effort is required noting that:

- resources (human, time, finance etc) are limited, consequently prioritization is a fundamental issue;
- planning must be realistic;
- longer term training such as CAT A or B are not covered because such training is out of the scope of the IHO CB budget.

Nowadays, the rapidly evolving technology has replaced old navigation paradigms and demands continuous investments in education and training so that the Hydrographic Services can continue to provide high quality products and services which satisfy new demands of the maritime community.

NIOHC is aware of its Member States' efforts to provide quality service to the international maritime community in order to contribute to the safety and security of navigation and human life at sea as well as the preservation of the environment in its region and, as part of the IHO community, to contribute to the achievement of the objectives and directions of the Organization.

#### 1.2. Aims and objectives

# NIOHC CB Plan 2013-2017

Since the last meeting of the NIOHC in *Oman* a year ago I have worked to our five year CB plan

There were four activities identified for 2016:-

- Chart Scheming Workshop (3 days)
- Introduction to MSDI & Data Management (in conjunction with the IIC Academy)
- CARIS Advanced ENC Production Course
- CARIS MBES Processing Course

# The Endorsed Activities for 2016

In a time of greater competition for financial resources for CB activity all **four** submissions were approved by the CBSC which met in Mexico City, Mexico, May 2015

- Chart Scheming Workshop (3 days)
- Introduction to MSDI & Data Management
- CARIS Advanced ENC Production Course (Sri Lanka)
- CARIS MBES Processing Course (Myanmar)

# The Endorsed Activities for 2016

## **Introduction to MSDI & Data Management (in conjunction with the IIC Academy)**

- Please refer to NIOHC CL 03/2016
- This course will run from 20-24 June 2016 at the IIC Academy in Visakhapatnam, India
- Deadline for applications is 08 April 2016

# NIOHC CB Plan 2013-2017

The NIOHC CB Plan 2013-2017 will be reviewed annually at NIOHC meetings and any emerging requirements for the other training initiatives listed (reference section 2) can be discussed by NIOHC members for inclusion into the next years plan, noting that submissions made to the CBSC for funding consideration are for the succeeding year

# The Proposed Activities for 2017

- Basic ENC & ENC Production (10 days)
- x2 CARIS technical training courses (5 days)
- Law of the Sea Workshop (5 days)
- Repeat Technical Visits?

**OR** we could have a vote? (similar to the one we had in Yangon in 2012)

# The Proposed Activities for 2017

	Bangladesh	Myanmar	Sri Lanka
<b>CARIS Paper Chart Composer</b>			Completed February 2013
<b>CARIS S-57 ENC Composer</b>	Completed May 2014	Completed for March 2014	Arranged for April 2016
<b>CARIS MBES Processing</b>	Completed April 2015	Arranged for June 2016	Completed April 2015

# The Proposed Activities for 2017

In a period of greater competition for CB funding it cannot be guaranteed that all activities will be endorsed

Noting that Technical visits and MSI courses nearly always get approved are the membership happy with my proposals?

# Advanced Training Opportunities

**Japan** through the Nippon Foundation –  
GEBCO Graduate Training Project at the UNH,  
USA (1 year)

CAT B Cartography (15 weeks) at the UKHO  
*See IHO CL 04/16 for this course (deadline for applications is 04 April 2016)*

**Republic of Korea -**

Masters programme in Hydrographic Surveying at  
the USM, USA (1 year)

CAT B Cartography (15 weeks spread over 3  
years) at KHOA, Busan, ROK

# Advanced Training Opportunities

## CAT B Cartography (15 weeks) at the UKHO

- Egypt and Myanmar were selected for last years (2015) course

# Questions

Any Questions?
